

Phoenix 4620 Series Data Commander

The Phoenix 4620 Series offers unrivalled protection for documents and data.

- 2 hours fire protection at temperatures over 1045°C.
- High Security electronic lock programmable with users own code up to 14 digits in length.
- Supplied as standard with pull out media drawers for the storage of your computer media.
- Double door construction with internal water resistant seals.

Phoenix 4620 Series Data Commander

As part of our strategy to create the finest range of protection against fire and theft, we introduce the Phoenix 4620 Data Commander Data Safe. This safe provides absolute protection for your data.

We know that fire strikes without warning!! But we also know there will be no warning of the theft or copying of confidential data or documentation. Overnight, a company's most expensive assets, research and development could fall into the hands of unscrupulous competitors, with potentially catastrophic results. That's why all 4620 series safes are fitted with a high Security electronic lock programmable with users own code up to 14 digits in length.

This safe has also been extensively tested by independent laboratories in both the UK and Sweden to provide 2hrs fire protection at temperatures of 1045 degrees C whilst maintaining an internal temperature well below the critical temperature for media of 52 degrees C.

The unit is supplied with pull out media drawers and can also be specified with a complete range of optional sliding drawer units or shelves ensuring that every combination of media can be stored with maximum efficiency.

● **Dimensions stated as:**

- A External height x width x depth
- B Internal height x width x depth
- C Door swing
- D Weight
- E Capacity
- F No of shelves, No of drawers, No of doors

● **Data Commander 4621**

- A 1160mm x 690mm x 720mm
- B 830mm x 395mm x 400mm
