

Safelincs Ltd, Unit 1, Farlesthorne Road, Alford, Lincolnshire, LN13 9PS

1) Place box with escape ladder underneath the window

2) Place hooks over the wall (Chain on outside with standoffs facing wall)

3) Lower ladder out of window section by section. Ensure that the chain does not tangle.

4) After use: Pull ladder back into room and check the ladder for damage. Place end of ladder into box first and layer chain into box, ensuring that the chain does not tangle. Place hooks in box last.

Please Note:

This routine has to be practised regularly. Immediately after purchase the ladder needs to be deployed and the standoffs fitted. Please refer to full instructions in box.

Important:

When testing the ladder stand on the bottom rung first before climbing out of window with ladder. This tests if the wall is strong enough.
