

UltraFire

Wet Chemical Fire Extinguishers

Why wet chemical? Specifically designed for use on fires involving cooking fat and oils, the wet chemical additive combines at the molecular level with the burning material to form a layer that smothers the fire and prevents reignition. A low pressure lance allows controlled use at a safe distance from the fire.

Where should wet chemical be used? Ideal for commercial kitchens, UltraFire wet chemical extinguishers are dielectrically tested to ensure user safety when used on electrical equipment such as fat fryers. The additional Class A rating for solid combustibles reduces or even removes the need for other extinguishers in the room.

Why UltraFire? Enjoy personal service, quality products and competitive trade pricing when you purchase from UltraFire. With many years of experience supplying a wide range of fire safety products to trade customers worldwide, UltraFire can offer you a reliable service and a range of delivery options to suit.

TECHNICAL DETAILS	MODEL	6ltr
	FIRE RATING	13A, 75F, Elec
	CHARGED WEIGHT	9.5kg
	OPERATING PRESSURE	12 bar
	DIMENSIONS (H x Dia)	680 x 161mm
	DISCHARGE RANGE	1 metre
	DISCHARGE TIME	60 sec
	FEATURE	Hose and Lance
	MED APPROVED	Yes
	PRODUCT CODE	UFSWC6

Suitability

Class A

Class B

Class C

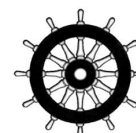

Class D

Electrical

Class F
