

This new LED suspended exit sign uses high illumination white LED's, in a small compact shell. Due to its low energy requirement from the mains power supply and the life span of the LED's and batteries, together with its self diagnostic processor, you can almost forget it's there. From this new technology we have been able to reduce the size of the overall unit to provide you with a compact internal use, IP30 rated, emergency exit sign. The ultra thin suspension cables give the impression that the sign is floating in midair. With the swivel knuckle joint version you can mount the unit on either wall or ceiling for ease of installation and with the added benefit of being able to be recessed or surface mounted this is an attractive alternative to a standard exit sign. Available in maintained self-test, they continuously test the battery voltage and the operation of the LED's every 15 days and every 6 months the autonomous duration of the battery. Control box colour is RAL 9010, LED housing is aluminium.

### Typical Applications

- Hotels
- Offices
- Art Galleries
- Shopping centres

### Features

- Chrome and Gold finishes available
- Recess and Surface mount
- Self Test 3hr Duration
- White high output LED's
- Charge and status indication LED
- Double sided legend
