

Cig-Arrête Sounder Beacon (Part No CSA-CSBB)

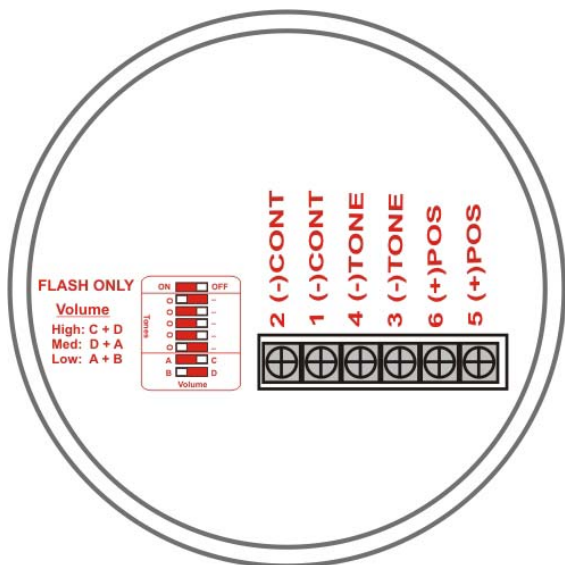

Combined Sounder / Beacon

The Cig-Arrête Combined Sounder Beacon provides both a visual and audible indication that an alarm has been generated by the Cig-Arrête System. The unit is normally installed above the door to the washroom, or toilet area protected by the Cig-Arrête system.

The CSA-CSBB requires 2 x PP3 9v alkaline batteries and is connected to the Cig-Arrête System as shown in the diagram below.

Volume, tone and flash are user programmable.

Installation and Configuration

Technical Specification

Voltage	18 –24 V dc
Typical Current	
High	41mA
Med	20mA
Low	14mA
Typical Output	
High	106 dB
Med	101 dB
Low	85 dB
