

Safelincs®

Fire Safety Solutions

Issue 4

Safelincs is the UK's most progressive and customer focussed fire safety provider offering over 4000 products and services not only in the UK, but also in Ireland, Germany, France and Italy.

A winner of several customer care awards, Safelincs prides itself on its total commitment to customer satisfaction. We are accredited to ISO 9001 by the British Standards Institute and certified by BAFE.

Operating the UK's largest online fire safety portal, we offer innovative fire safety solutions and services, market leading fire safety products and have a dedicated team of professional fire safety advisors and engineers.

We don't just claim to be the best fire safety provider, our customer feedback, collected by Trustpilot, rates us as "Excellent" as a service provider.

UltraFire

Our UltraFire fire extinguishers are manufactured to the highest specifications and feature the CE mark as well as the British Standards Institute's Kitemark approval. The BAFE certified manufacturing process has been perfected using industry expert knowledge and experience as well as market leading technologies.

All UltraFire extinguishers are supplied in sturdy boxes with unique polystyrene head protection because we want you to receive the product in the same condition as it left us.

Specialist Handheld Extinguishers	17
Designer Extinguishers & Storage	18 - 19
Wheeled Fire Extinguishers	20
Extinguisher Storage & Accessories	21 - 26

CO2 Fire Extinguishers

Containing pure carbon dioxide, CO2 fire extinguishers contain a completely clean extinguishant and leave no residue after discharge. They do not cause shorting of electrical circuits and are therefore used frequently on electrical equipment, servers, plant rooms and consumer units. They are also suitable for Class B flammable liquid fires (petrol, oil, solvents, etc.). It is usually required to install a water-based extinguisher in tandem with a CO2 to cover wider fire risks.

All of our new CO2 extinguishers are provided with horn and hose assembly as standard and are manufactured from a lightweight alloy.

Foam Fire Extinguishers

Extinguishing fire by cooling and smothering, foam fire extinguishers are suitable for Class A (combustible solids) and Class B fires (flammable liquids such as petrol, oil and solvents). Foam extinguishers are widely used in offices and indoor areas. UltraFire foam extinguishers, like many other foam extinguishers, should not be used on live electrical equipment, however the Britannia range can, as Britannia extinguishers operate safely on voltages of up to 1000 Volts

Water Fire Extinguishers

The most traditional extinguishers, water fire extinguishers are suitable for Class A fires (combustible solids) and extinguish the fires by penetrating the burning material and creating a cooling effect.

Our 3ltr and 6ltr water extinguishers contain an additive giving them a much higher rating for their size than ordinary water extinguishers. The rating of a 6ltr water with additive fire extinguisher is the same as a 9ltr standard water unit.

Save Time & Money

With P50 service-free fire extinguishers

BRITANNIA FIRE

Britannia P50 Service-Free Fire Extinguishers

Britannia service-free extinguishers do not require maintenance by an extinguisher engineer or a discharge test over their entire 10 year lifespan, which offers you massive savings. The extinguishers are kitemarked, CE marked and supplied with a 10 year warranty.

No Maintenance Costs

Britannia P50 extinguishers do not require maintenance by an extinguisher engineer. They can be maintained easily by any person following a simple, 3-step process.

Approvals and Testing

As certified BAFE manufacturers, Britannia produces these extinguishers to the highest standards with kitemark certification and CE mark to BS EN 3. In addition the extinguishers are tested with a crush test and subsequent 12000 cycle test.

10 Year Warranty

P50 fire extinguishers come with a 10 year manufacturer's guarantee. The inner core is constructed using Aramid fibres (material used in bullet-proof jackets) and the entire extinguisher is 100% corrosion proof.

Free Delivery and Installation Service

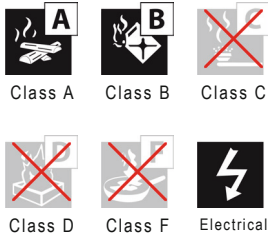

Our P50 extinguishers are installed and certified by our BAFE certified extinguisher engineers, free of charge. We also carry out a free site survey at the point of installation to ensure that your premises are fully protected.

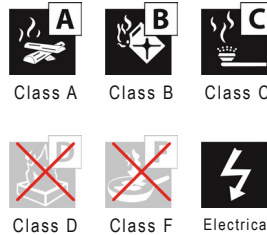

Britannia P50 6ltr Foam Extinguisher

P50 foam fire extinguishers are suitable for Class A and Class B fires with a 27A rating which is far superior to standard foam units. The P50 can also be used safely on live electrical equipment at a minimum distance of 1m.

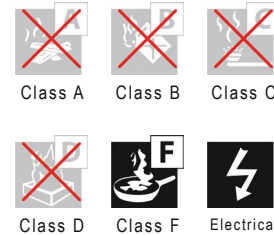

Britannia P50 6kg Powder Extinguisher

P50 ABC powder fire extinguishers are able to tackle Class A, Class B and Class C fires and fires involving live electrical equipment. These extinguishers are commonly found in open air environments, plant rooms and fuel storage areas.

Britannia P50 6ltr Wet Chemical Extinguisher

The F-Class extinguisher is specially designed to tackle cooking fat fires, making it ideal for commercial and industrial kitchens and can also be used safely on live electrical equipment at a minimum distance of 1m.

Discharge Time	35 sec.

UltraFire Water Mist Fire Extinguishers

Water mist is where water is discharged in a super-fine spray to form a mist curtain. Water mist uses 100% de-ionised water and has much broader fire fighting capabilities than powder, foam and wet chemical fire extinguishers.

Innovative Dry Water Mist Technology

The patented nozzle is able to produce over 22 billion water droplets from only 1 litre of water, creating a mist that leaves almost no trace and no collateral damage.

Broad-Spectrum Extinguisher Capabilities

Water mist fire extinguishers are capable of tackling almost all common fires including class A, B, C, F and electrical fires. The unique water mist has the cooling effect of water and creates a 'mist curtain' cutting off the oxygen supply. The droplets are so small that they have no adverse reaction with burning liquids, allowing the dry water mist to be used on class B and F fires.

Completely Safe To Use On 1000V

De-ionised water cannot conduct electricity and the droplets created are so well dispersed that electricity cannot travel through them. This allows E-series extinguishers to be used safely on and around fires involving electrical equipment (minimum 1m discharge distance).

Approvals and Testing

Water mist extinguishers are manufactured using a BAFe approved process and are tested to the highest standards. Water mist extinguishers are Kitemarked to BS EN 3 and CE marked.

UltraFire 3ltr Water Mist Fire Extinguisher

Water Mist extinguishers have a supersonic nozzle that creates a microscopic mist curtain, reducing oxygen and forming a cooling blanket to extinguish the fire.

Rating	8A, 13B, 25F
Dimensions	525x161mm
Weight	7.0kg
Discharge Time	32 sec.

UltraFire 6ltr Water Mist Fire Extinguisher

Filled with de-ionised water, Water Mist extinguishers cause less residue to clean up as the water is so fine and evaporates very quickly.

Rating	13A, 21B, 75F
Dimensions	585x183mm
Weight	11.5kg
Discharge Time	65 sec.

Did You Know?

We also stock a 1ltr model of the E-Series dry water mist extinguisher which is perfect for use in the kitchen, on boats and in caravans.

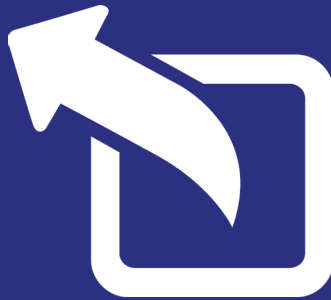

Economy Fire Blanket

Manufactured from non-flammable woven glass fibre and supplied in a wipe-clean soft pouch, these economical fire blankets provide great value for money, are Kitemarked and offer great protection in cooking areas.

UltraFire Hard Case Fire Blankets

These high quality, Kitemarked hard case clam shell style fire blankets are available in a range of sizes. The wall mounted case is durable while allowing quick and easy access to the blanket in the event of a fire.

Service-Free 2ltr Foam Fire Extinguisher - Britannia P50

The Britannia P50 2ltr foam service-free fire extinguisher carries an 8A, 55B rating and does not require an engineer call-out during its 10 year life.

Service-Free 2kg Powder Fire Extinguisher - Britannia P50

Kitemarked to the latest British Standard, the Britannia 2kg powder P50 has a 10 year life after which it can be factory refurbished to give it a further 10 year life.

Ultrafire 1ltr Water Mist Fire Extinguisher

The water mist fire extinguishers are the first water fire extinguishers to gain an 'F' rating for use on deep fat fryers. They can also be used on Class A, B, C & electrical fires.

Lith-EX 400ml AVD-Li Lithium Battery Fire Extinguisher

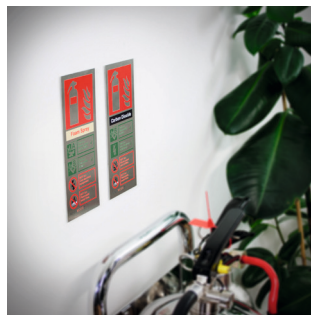

The Lith-EX fire extinguisher is the first fire extinguisher designed specifically to tackle lithium battery fires and is ideal for protecting areas where mobile devices are charged.

Henry Wolfe Designer Fire Extinguishers

Manufactured from attractive stainless steel and aluminium, this range of designer fire extinguishers has been sourced by Henry Wolfe for its superior quality. Ideal for installation in corporate reception areas, restaurants, upmarket retail outlets, hotel lobbies, historical buildings, luxury accommodation and many other locations where aesthetics are important.

Universal Fire Point - Single

The 'multi-disc' system allows these fire points to accommodate a range of extinguisher sizes.

Universal Extinguisher Stand - Single

Suitable for a single fire extinguisher in a range of sizes from a 2kg CO2 up to 9ltr water.

Rotationally Moulded Stand - Single

Free-standing single stands made from chemical resistant, rotationally moulded plastic.

Universal Fire Point - Double

These universal fire points are a simple, cost effective alternative to wall mounting of fire extinguishers.

Universal Extinguisher Stand - Double

Constructed from high-impact plastic and designed to store two fire extinguishers.

Rotationally Moulded Stand - Double

Featuring a 'skirting board recess' at the rear allowing the stand to sit flush to the wall.

Single Metal Fire Extinguisher Stand

These fire extinguisher stands are designed to hold one fire extinguisher up to 9kg or 9ltr in size (not suitable for 5kg CO2 fire extinguishers). Supplied with brackets.

Double Metal Fire Extinguisher Stand

Discreet, durable and finished in a red powder coat paint, these extinguisher stands are designed for locating fire extinguishers without having to wall hang.

Single Chrome Fire Extinguisher Stand

Ideal for locations where wall hanging is not an option or where it would detract from the overall look of a room, these single stands are both functional and stylish.

Double Chrome Fire Extinguisher Stand

Stylish, compact and durable, these chrome extinguisher stands are perfect for modern office environments, function rooms and reception areas.

Fire Extinguisher Trolley - Single

Designed to hold one fire extinguisher, these trolleys are ideal when a mobile fire point is needed. Extinguishers can be heavy and trolleys allow safe, controlled and easy movement. Available with or without rotary hand bell.

Fire Extinguisher Trolley - Double

For applications such as building sites, two extinguishers can be paired together. The double fire extinguisher trolley allows for the extinguishers to be easily transported.

Rotationally Moulded Extinguisher Trolley

Perfect for outdoor applications, this mobile fire point is constructed from 100% recyclable hard-wearing plastics and can accommodate two fire extinguishers.

Wheeled Fire Point with Rotationally Moulded Cabinet

Ideal for temporary sites, this wheeled fire point features a rotationally moulded weatherproof cabinet, suitable for holding 2 x 9kg/ltr and 1x 2kg CO2 fire extinguisher.

Fire Extinguisher Storage Cabinets

A range of cabinets suitable for single and double extinguisher protection and storage.

Fire Extinguisher Covers

High quality PVC covers designed to protect fire extinguishers from the elements while allowing quick access.

Safelincs Single Fire Extinguisher Cabinet

Constructed from impact resistant plastic to provide protection from accidental damage and the elements.

Gloria Vehicle Box For Fire Extinguishers

Used to hang or mount fire extinguishers externally on trucks and other vehicles.

Caravan Park Fire Extinguisher Cabinet

This double fire extinguisher cabinet has been specifically designed for caravan and leisure parks.

Hose Reel Cabinet

Designed to accommodate most 19 and 25mm swinging hose reels and hose reel accessories.

Plastic Fire Bucket

Available with or without a matching plastic lid, this plastic fire bucket is suitable for garage forecourts, caravan parks, events, etc. These buckets have an 8 litre capacity and can hold sand, water or specialist absorbant material.

Metal Fire Bucket

Suitable for many applications, the metal fire bucket is designed for installing in locations such as garage forecourts, generator rooms, caravan parks, etc. Available with or without matching metal lid.

Fixed and Swinging Hose Reels

Kitemarked (BS EN 671-1: 1995) these hose reels are available in fixed or swinging versions and can be supplied with or without 19mm fire hose. All models supplied complete with matching jet spray nozzle.

Hose Reel Cover

Designed for use with most 19mm and 25mm hose reels, our fire hose reel cover provides protection against damage whilst allowing easy access for use in the event of an emergency.

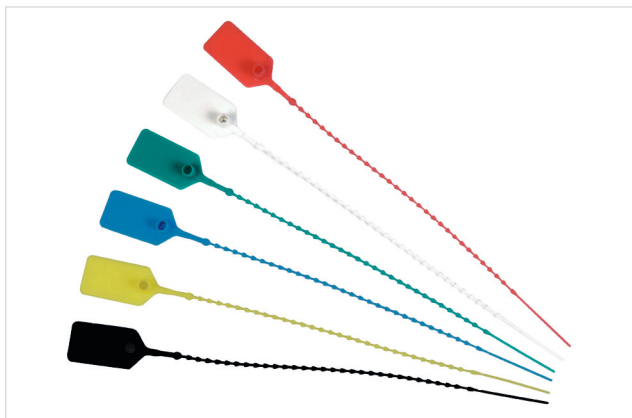

Mini Theft Stopper for Fire Extinguishers

The mini theft stopper is supplied with two clips, enabling it to be used with either a fire extinguisher or a fire extinguisher cabinet.

Fire Extinguisher Theft Stopper STI 6200

Designed to prevent theft, misuse or vandalism of fire extinguishers. This theft stopper features a powerful 98 dB alarm that sounds when the fire extinguisher is removed.

Fire Extinguisher Pull-Tite Tamper Seals

Tamper seals give a visual indication that an extinguisher has not been tampered with or discharged. Supplied in a range of colours in packs of 1,000.

Low Cost Delivery

We will always offer the lowest possible shipping prices for all of the products we supply.

FireAngel 9V Battery Optical Smoke Alarm- SO-601

A battery powered smoke alarm with an optical smoke sensor to detect smouldering fires and reduce false alarms from cooking fumes.

FireAngel 9V Battery Combined Smoke and Heat Alarm - ST-625

Thermally enhanced for improved detection of smouldering fires and a “sleep-easy” function to silence low battery warning chirps at night.

FireAngel 9V Battery Ionisation Smoke Alarm with Escape Light - LSI-601

The LSI-601 provides quick detection of fast-flaming fires and has a built in LED light to illuminate your escape route in an emergency.

FireAngel 10 Year Battery Ionisation Smoke Alarm - SI-610

Powered by a sealed 10 year lithium battery, the FireAngel SI-610 ionisation smoke alarm is ideal for properties where annual battery replacement would prove inconvenient.

FireAngel 10 Year Battery Combined Smoke and Heat Alarm - ST-622

Using the sensing technology of choice for the UK's Fire and Rescue Service, the FireAngel ST-622 is a sealed 10 year battery powered Thermoptek smoke alarm.

FireAngel Radio-Interlinked Combined Smoke and Heat Alarm - WST637

The WST-637 thermoptek optical smoke alarm with 10 year sealed battery, capable of connecting with up to 50 devices using wireless interlink technology.

FireAngel 10 Year Battery Heat Alarm- HT630

The HT-630 heat alarm from FireAngel quickly detects rapid temperature increases, and is powered by a sealed 10 year lithium battery designed to last for the life of the alarm.

FireAngel Radio-Interlinked Heat Alarm - WHT637

The FireAngel WHT-637 is a 10 year sealed battery Thermistek heat alarm from the radio-interlinked Wi-Safe 2 range of devices.

FireAngel 10 Year Thermally Enhanced Smoke Alarm ST-750T

The ST-750T features groundbreaking Thermoptek technology; when the alarm detects a rise in temperature the optical sensor becomes extra sensitive, making it able to detect fires much faster than standard optical alarms. Powered by a sealed Panasonic lithium battery, there is no need to change the alarm's battery for its entire 10 year lifespan.

Smoke Alarms

FireAngel®

Order before 2:30pm for next working day delivery

A **faster response** to the dangers of fire and carbon monoxide.

Wi-Safe 2 technology provides wireless communication across a range of products, intelligently linking them to give a faster response to the dangers of smoke and carbon monoxide.

Wi-Safe[®] **2**

Wireless interlink alarm by FireAngel

FireAngel Pro 230V Smoke And Heat Alarm - ST-230

The ST-230 is a thermally enhanced optical smoke alarm suitable for alarm installations complying to BS 5839-6:2013 Grade D, E & F.

FireAngel Pro 230V Radio-Interlinked Smoke Alarm - WST-230

The WST-230 features wireless interconnection allowing up to 50 radio-interlinked alarms to be connected to form a system.

FireAngel Pro 230V Heat Alarm - HT-230

The FireAngel Pro HT-230 mains powered heat alarm has a 10 year sealed lithium back-up battery designed to last for the life of the alarm without the need to replace.

FireAngel Pro 230V Radio-Interlinked Heat Alarm - WHT-230

The FireAngel Pro WHT-230 is a mains powered heat alarm with built-in RF technology, enabling wireless interconnection with up to 50 other FireAngel Pro RF alarms.

Mains Powered Ionisation Smoke Alarm - Ei141

Mains powered ionisation smoke alarm for landings with alkaline back up battery and interconnectable via hard wiring.

Mains Powered Heat Alarm - Ei144

Mains powered heat alarm with alkaline back-up battery, interconnectable via hard wiring. For kitchens and garages.

Mains Powered Optical Smoke Alarm - Ei146

Mains powered optical smoke alarm, alkaline backup battery, interconnect via hard wiring. For halls, living/bedrooms.

Radio-interlinked Ei141

Mains powered ionisation smoke alarm, alkaline back-up battery with an RF base for Interconnection, suitable for landings.

Radio-interlinked Ei144

Mains powered heat alarm for kitchens and garages has an alkaline back-up battery with an RF base for Interconnection.

Radio-interlinked Ei146

Mains powered optical smoke alarm with RF base for Interconnection and alkaline back-up battery for hallways, living rooms and bedrooms.

Mains Powered Ionisation Smoke Alarm - Ei161e

Mains powered ionisation smoke alarm with a rechargeable lithium back-up battery. Detects fast flaming fires.

Mains Powered Heat Alarm - Ei164e

Mains powered heat alarm for kitchens and garages. Fitted with a rechargeable lithium back-up battery.

Mains Powered Optical Smoke Alarm - Ei166e

Mains powered optical smoke alarm fitted with a rechargeable lithium back-up battery.

Radio-interlinked Ei161RC

Mains powered ionisation smoke alarm for landings, fitted with a rechargeable lithium back-up battery and RF base for interconnection.

Radio-interlinked Ei164RC

Mains powered heat alarm with rechargeable lithium back-up battery and RF base for interconnection. Ideal for kitchens and garages.

Radio-interlinked Ei166RC

Mains powered optical smoke alarm with interconnecting RF base and a rechargeable lithium back-up battery. Ideal for slow smouldering fires.

Easichange Replacement Alarm Kits

Smoke and heat alarms must be replaced after ten years when their useful life expires. With mains powered smoke alarms this usually means having to call out an expensive electrician to carry out the work. Safelincs and Ei Electronics have developed a range of replacement smoke alarms which can be installed by yourself in less than a minute.

Hearing Loss Alarm Solutions

Fire Alarm Systems

Fire alarm systems are essential for the adequate detection and warning of a fire situation within commercial and residential premises. The detection and visual and audible warning requirements of a fire alarm system are dependent on the layout, use and occupancy of the building. We have a range of equipment, supplied by the industry's leading manufacturers and manufactured in accordance with the latest standards, to suit all needs.

Fire Alarm Systems

FireRay Reflective Infrared Optical Beam Smoke Detector

The FireRay conventional infrared optical beam smoke detectors provide economical and effective protection of large, open-plan spaces.

FireRay 5000 - Motorised Infrared Optical Beam Smoke Detector

The FireRay 5000 is a motorised, auto-aligning, infrared optical beam smoke detector suitable for the protection of large areas.

FireRay 3000 - End to End Infrared Optical Beam Smoke Detector

FireRay 3000 end to end optical beam smoke detector has been designed to protect large spaces with reflective surfaces.

Smart+Guard Red Call Point Cover

Tough polycarbonate call point cover available in surface or flush mounted versions with optional sounder.

Smart+Guard Water-proof Call Point Cover

Call point cover fitted with waterproof gasket designed to protect call points in harsh environments.

Smart+Guard Green Call Point Cover

Suitable for protecting release call points and switches. Available with a range of fitting options.

STI Call Point Cover 'Stopper' in Red

Ideal for retrofitting over existing call points and available in surface and flush mounted versions.

STI Call Point Cover 'Stopper' with Alarm

Flush or surface mounted call point cover with integral sounder to deter vandalism or misuse.

STI Call Point Cover 'Stopper' in Green

Available in flush or surface mounted versions with optional integral sounder for additional protection.

Shaping Alarm Technology for over 20 Years

Smoke Detector Testing Equipment

Solo detector testing equipment enables competent persons to inspect and test BS 5839-1 fire alarm systems as per the requirements of legislation. We supply a range of testing devices and equipment, aerosol canister testers and replacement products as well as pre-assembled kits .

Solo detector testing equipment includes a range of telescopic and extension access poles, allowing technicians to test detectors from ground level, negating the need and risk of using ladders and expensive scaffolding. The access poles can be used with the range of Solo cordless and mains powered smoke and heat dispensing heads as well as the universal detector head removal unit.

Carbon Monoxide & Gas Detection

FireAngel Natural Gas Alarm with AA Batteries - NG-9B

The FireAngel NG-9B is designed to detect combustible gas before it reaches dangerous levels and is suitable for wall mounting or as a free standing portable device.

Honeywell EzSense Flammable Gas Detector

The Honeywell EzSense is a portable device used to detect the presence of flammable gases including methane (natural gas), propane, butane, LPG and LNG.

AMS S/200P Mains Powered LPG and Natural Gas Alarm

The AMS S/200P alarm is designed for use in residential properties for the detection of propane, butane (LPG) and methane (natural) gas.

Dräger Pac Series Single Gas Detectors

The Dräger Pac 7000 is ideal for personal monitoring in the workplace. Its robust design meets the requirements of IP65 protection and it is impervious to corrosive chemicals.

Dräger X-am Series Gas Detectors

Dräger X-am multi gas detector has a robust single-handed operation design and is available in a range of models with single and multi gas sensors for a variety of applications.

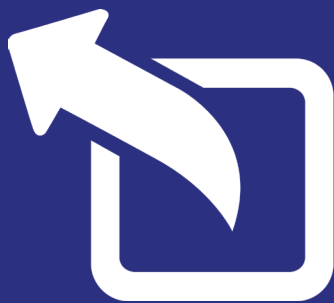

Portable CO2 Detector Gasman Complete with Charger

The Gasman portable CO2 detector is designed for employees and staff working in various locations such as breweries, laboratories, cellars and industrial environments.

Dräger X-am 5600 Series Gas Detectors with CO2 Sensor

Ideal for personal monitoring applications, the Dräger X-am 5600 multi gas detector has a robust single-handed operation design with an IP67 protection rating.

Fire Doors & Accessories

Pages 51 - 62

We offer standard and bespoke fire doors with a host of optional features such as wood veneers and glazing. We also supply a full range of fire door accessories.

Fire Doors (FD30 / FD60)	52 - 53
Fire Door Retainers	54 - 56
Fire Door Closers	57 - 60
Fire Door Seals	61
Fire Door Furniture	62

Bespoke Fire Doors

Our internal wooden fire doors are available with 30 minute (FD30) and 60 minute (FD60) fire ratings and can be supplied in a wide range of standard and made-to-measure sizes.

You can design your entire fire door within 5 minutes using our simple online configurator. The system will allow you to select your fire rating, if you require single or double door sets, and choose from various styles, finishes and glazing options.

BWF-Certified

We only supply doors manufactured in the UK at a BWF-Certifire Scheme and are supplied complete with a certificate of approval to verify the door's fire integrity. The doors are also fitted with with a BWF label which shows the doors fire integrity and the manufacturers registration number.

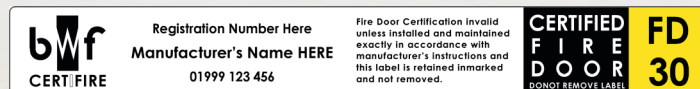

Manufactured in the UK

Our fire doors are made in the UK at our BWF certified manufacturing plant. All our fire doors are delivered by our dedicated courier and have a delivery lead time of 2-4 weeks from the date of order. Once your door is ready we will contact you to arrange a suitable delivery time.

30 Minute Fire Doors (FD30)

Our 30 minute fire doors are 44m thick and are made using a BWF-Certifire certified FD30 core.

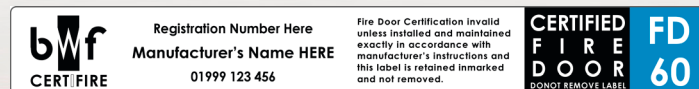

The doors are supplied with a BWF label (as shown below) to verify the fire doors integrity.

60 Minute Fire Doors (FD60)

Our 60 minute fire doors are 54m thick and are made using a BWF-Certifire certified FD60 core.

The doors are supplied with a BWF label (as shown below) to verify the fire doors integrity.

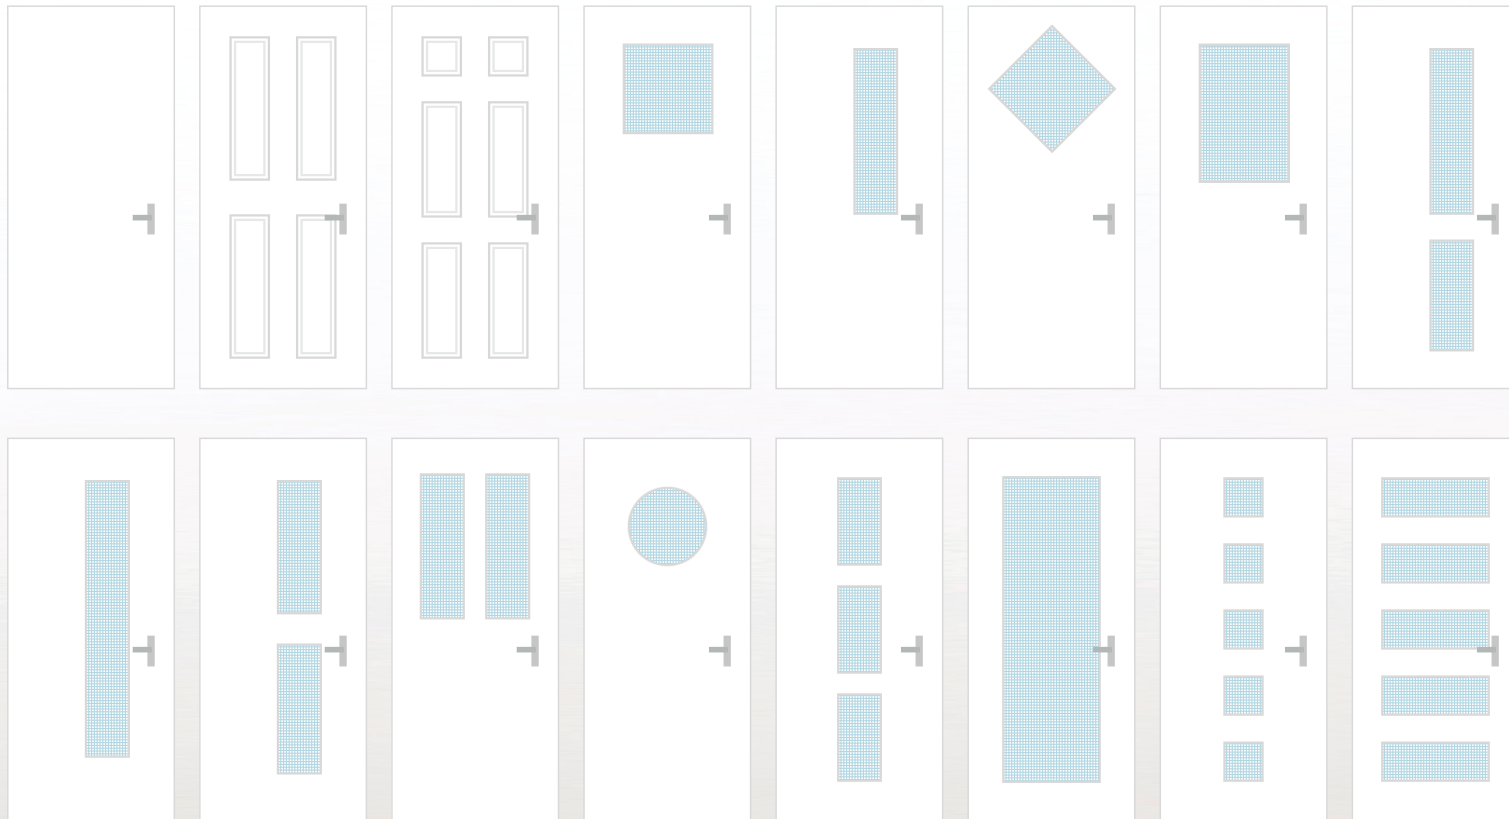

Panel and Glazing Options

Our doors are available as either plain leaf, with raised panels or with various glazing options. Our raised panel doors, commonly known as “raised and fielded panels”, have a bevelled edge surround on the panel and give a decorative finish.

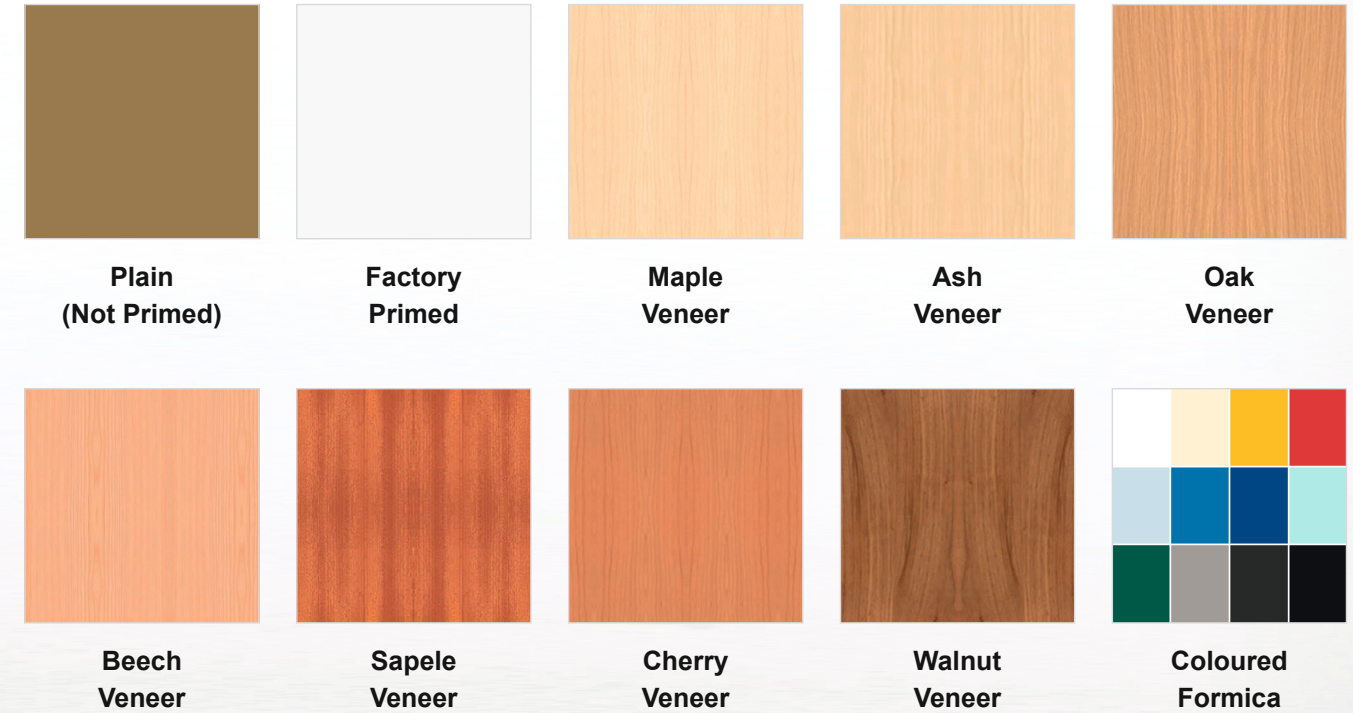

All of our glazed doors are supplied as standard with fire rated Georgian Wired glazing but can be upgraded to fire rated Pyrobelite clear glass to give a sleeker finish. The glass panes are lipped in the same material as the main body of your door leaf.

Please Note: Raised panels and glazing cannot be requested on the same door.

Finish Options

We can supply our doors in a range of different finish options to suit your requirements. Our plain fire door is supplied non-primed and ready for painting allowing you to choose your colour after we have delivered it. Our range of real wood veneers provide a premium finish and are designed to compliment any interior.

Did You Know?

We can also pre-cut a rebate around the edge of your fire door and supply the appropriate intumescent fire and smoke seals.

Fire door
keep shut

Fire Door Retainers

Dorgard Fire Door Retainers

Dorgard has a rubber foot (or ferrule) which remains in contact with the floor and, unlike magnetic fire door retainers, can hold the door open in any selected position. When a fire alarm sounds, the integral audio-electronic device inside the Dorgard signals the the plunger to retract the foot, allowing the fire door to close normally.

Dorgard Black

Dorgard White

Dorgard Red

Dorgard Accessories

Dorgard Replacement Feet

These feet are designed for easy replacement when the grip on the foot has worn and no longer grips the floor.

Dorgard Floorplate

The Dorgard floorplate provides the Dorgard's foot a place to rest and hold the door open securely.

Geofire Doormouse Fire Door Holder

The Geofire Doormouse is a surface mounted electromagnetic door holder connected to the fire alarm panel.

Geofire Conquest Fire Door Holder

The Geofire Doormouse is a flush mounted electromagnetic door holder connected to the fire alarm panel.

Geofire Floor Mounted Fire Door Holder

A floor mounted electromagnetic door holder which is connected to the fire alarm panel.

Geofire Marine IP65 Fire Door Holder

Designed to withstand the elements and harsh environments. Ideal for marine and outdoor applications.

Geofire Agrippa Acoustic Door Holder

The Geofire Agrippa is an acoustically triggered fire door holder which will release the fire door upon hearing the fire alarm.

free-swing door closers

Briton 121CE - EN 3 Overhead Door Closer

The Briton 121CE is a compact door closer that is suitable for use on the most popular door sizes.

GEZE TS1000C - EN 3 Overhead Door Closer

The GEZE TS1000C is an overhead rack and pinion door closer suitable for internal applications.

Dorma TS71 - EN 3/4 Overhead Door Closer

The Dorma TS71 has been tested and approved to EN 1154 and has a 120 minute fire rating.

Briton 2003 - EN 3 Overhead Door Closer

The Briton 2003 is the UK's most popular overhead door closer, is CE marked and Certifire approved.

GEZE TS2000V - EN 2-5 Overhead Door Closer

The GEZE TS2000V is an EN power size 2-5 rated overhead door closer with optional back check.

Dorma TS83 - EN 3-6 Overhead Door Closer

The Dorma TS83 overhead door closer has an adjustable power size of EN 3-6 for doors up to 1400mm wide.

Perko Concealed Door Closer

The original concealed door closer available with rounded or square plates and a range of finishes.

Astra 3003 Series Concealed Door Closer

The Astra 3003 Series concealed door closers are manufactured and certified to BS EN 1634 and BS EN163

Perko Perkomatic R85 Concealed Door Closer

The Perkomatic R85 is a durable 60 minute fire rated concealed door closer with adjustable latching speed.

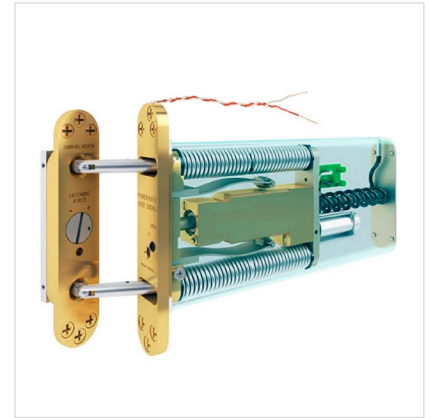

GEZE Boxer Concealed Door Closer

The Boxer is a fully concealed door closer ideal for installation in locations where style is important.

Perko Powermatic Concealed Door Closer

The Perko Powermatic concealed door closer is a high quality product, offering minimal visibility.

Powermatic Free Swing Door Closer

Free Swing door closer, designed for applications where permanently closed doors are not ideal.

Dorma TS90 Overhead Slide Arm Door Closer

The TS90 is an economic cam action overhead door closer with adjustable closing speed and latching action.

Dorma TS91 Overhead Slide Arm Door Closer

The Dorma TS91 is a cam action overhead door closer with slide channel arm.

Dorma TS93 Overhead Slide Arm Door Closer

The Dorma TS93 closer has an adjustable power size of EN 2-5 and is suitable for doors up to 1250mm wide.

Briton 2003T Track Arm Door Closer

The Briton 2003T is a fixed strength track arm door closer that retains all the key features of the standard 2003.

Briton 1130B.TE Electromagnetic Closer

With an electromagnet in the slide track arm, this door closer is designed to be connected to your alarm system.

GEZE TS5000 Guide Rail Door Closer

The TS5000 offers a fully variable closing action making it ideal to meet DDA recommendations.

GEZE TS4000EFS Hold Open Free-Swing Door Closer

The GEZE TS4000EFS is an electrohydraulic hold open door closer supplied with a free swing arm. Ideal for use in residential homes, hospitals and schools.

Briton 996 Hold Open Free-Swing Door Closer

The Briton 996 is an electromagnetic hold open door closer. When the device registers a signal from your fire alarm panel it closes the door to restore your fire barrier

Geofire Agrippa Acoustic Free-Swing Door Closer - Power Size EN 4

The Agrippa free-swing door closer allows fire doors to be used like a normal door without the user having to fight against the pressure of a door closer.

Freedor Wireless Hold Open Free-Swing Door Closer

The Freedor is a completely wireless and battery operated free-swing fire door closer. The fire door is allowed to swing freely but will close when the fire alarm sounds.

Rebated Fire Door Seals - 10mm 30 Minute Fire and Smoke

Rebated seals are fitted into existing rebates in the door or the frame and through heat from a fire they will expand to fill the gap and create an effective barrier to smoke and fire.

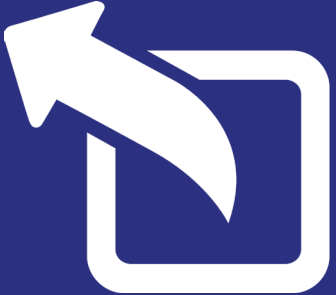

Rebated Fire Door Seals - 15mm 30 Minute Fire and Smoke

Intumescent fire and smoke seals are essential for fire door assemblies. Available in white or brown and in single door or double door kits for your convenience.

Surface Mounted Fire Door Seal Kits 60 Minute Fire and Smoke

Surface mounted fire door seals are easy to install; simply stick the strips with their self-adhesive backing to the frame or to the fire door itself.

Turn to Page 52

To see our full range of customisable fire doors which are available with 30 and 60 minute fire ratings

Fire Door Hinges - 60 Minute Fire Rated - Supplied in Sets of 3

These sets of three ball bearing fire rated hinges are designed for use on 60 minute internal and external fire doors. Grade 13 (110kg hanging weight) rated.

Self-Closing Door Hinges with Intumescent Backing

Self-closing door hinges operate as door closers on doors where, for example, the installation of overhead door closers would be inappropriate (in domestic settings).

Ironmongery Protection for Fire Door Locks, Hinges and Door Closers

These strips of graphite based intumescent material can be cut to the exact size required and installed under door locks, striker plates, hinges and door closers.

Astroflame Fire Rated Door Viewers Complete with Intumescent Protection

The Astroflame fire rated door viewers offer 60 minutes of fire protection and provide a 160° view outside of your door.

Fire Exit Equipment & Access Control

Pages 63 - 74

A range of emergency and panic hardware and a collection of fire exit devices and accessories to aid evacuation and access throughout a building.

Fire Exit Push Pads	64 - 65
Fire Exit Panic Bolts	65
Fire Exit Panic Bars	66 - 69
Outside Access Devices	70
Emergency Key Boxes	71
Fire Exit Security	72 - 73
Access Door Control Systems	74

Briton 1438 Single Door Emergency Pad with Latch

Like all emergency pads this pad is designed for use by trained personnel. It features a retracting latch which releases an exit door when the push pad is pushed.

Briton 372 Single Door Emergency Pad with Bolt

The Briton 372 emergency push pad is suitable for final exit doors of private buildings where personnel have been trained how to use the exit equipment.

Briton Double Door Emergency Pad Set with Latch & Bolt

This Briton double door emergency pad set comprises of the Briton 1438 emergency push pad latch, the Briton 372 vertical bolt and a double door strike.

Briton Double Door Emergency Pad Set with 2 Bolts

Suitable for non-rebated double doors, this emergency fire exit hardware set comprises of two Briton single door push pads with adjustable vertical bolts.

Exidor 297 Single Door Emergency Pad with Latch

The Exidor 297 emergency push pad is suitable for final exit doors of private buildings where occupants of the building are familiar with their surroundings.

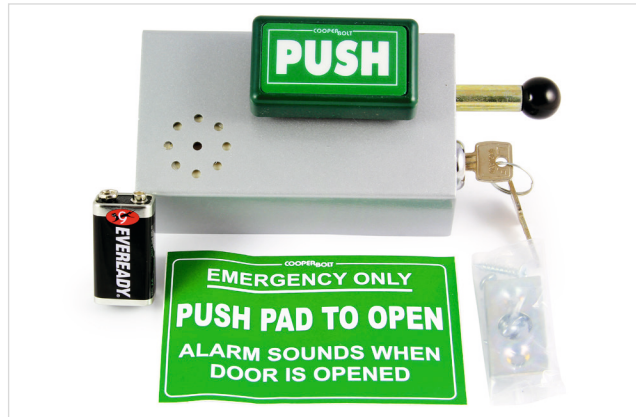

Exidor 293 Single Door Emergency Pad with Bolt

The Exidor 293 single door push pad is designed for use on final exit doors leading outwards from commercial premises where the building's layout is known to the occupants.

Redlam Panic Bolt - Mk1 & Mk2

The Redlam panic bolt locks and secures single external fire exit doors from the inside without jeopardising a safe escape. In an emergency the Ceramtube™ is broken with a small hammer, resulting in the panic bolt retracting.

Cooper Bolt Emergency Bolts

Available in inward and outward opening versions, with or without built-in alarm and in a water resistant casing, the Cooper Bolt range provides security for emergency exits while allowing access in the event of a real emergency.

Briton 378 Single Door Panic Bar with Latch

The Briton 378 single door panic bar with latch is ideal for use on final exit doors that members of the public will have access to.

Briton 376 Single Door Panic Bar with Bolt

The Briton 376 single door push bar is fitted with a vertical bolt which, when the bar is pressed, retracts and allows the door to open.

Briton Double Door Panic Bar Set with 2 Bolts

The Briton double door panic bar set consists of two push bars with adjustable vertical bolts, suitable for use on non-rebated double doors.

Briton 377 Double Door Panic Bar Set with Latch & Bolt

Comprising of the Briton 376 vertical panic bolt, the 378 reversible panic latch and a double door strike, the 377 panic bar set is designed for use on rebated double doors.

Exidor 296 Single Door Panic Bar With Latch

The Exidor 296 single door panic bar with latch is ideal for use on final exit doors in buildings that could be accessed by members of the public.

Exidor 294 Single Door Panic Bar With Bolt

The Exidor 294 single door push bar is fitted with a vertical bolt which, when the bar is pressed, retracts and allows the door to open.

Exidor 285 Double Door Panic Bar Set With Latch & Bolt

The Exidor 285 double door panic bar set is designed for use on rebated door sets, and as such is provided with a panic bolt and an accompanying panic latch.

Exidor 284 Double Door Panic Bar Set With 2 Bolts

The Exidor 284 double door panic bar set is manufactured in the UK and is designed for use on non-rebated door sets, and as such is provided with two bolts.

Exidor 400 Single Door Touch Bar Deadlocking Latch

Exidor's 400 series single door touch bars feature a deadlocking latch and are available in two sizes to suit doors up to 900mm or 1200mm wide.

Exidor 404 Single Door Touch Bar With Three Point Locking

Exidor's 404 and 405 single door touch bars use a three point locking system for extra security. This makes them two of the most secure options available on the market.

Briton 571 Single Door Touch Bar with 1 and 3 Point Locking

The Briton 571 Touch Bar is a slimline, stylish panic device suitable for use on timber or steel doors that are accessible to the public.

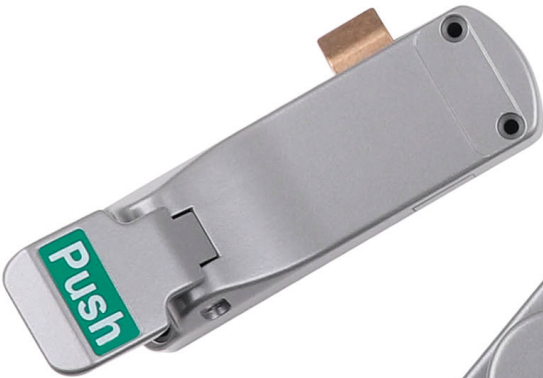

Did You Know?

Panic hardware should always be used in public buildings to help avoid crush situations.

EXIDOR

UK Manufactured
Fire Exit Hardware

Exidor 322 Outside Access Device With Lever

Exidor's 322 allows secure access into a building from the outside, whilst enabling exit hardware to function normally from the inside of the building.

Exidor 302 Outside Access Device With Knob

Exidor's 302 allows for the provision of secure access into a building from the outside, without compromising the functionality of the escape hardware inside the building.

Briton Knob Operated Outside Access Device

The Briton 1413/KE knob operated outside access device is designed for use on timber or metal doors fitted with Briton emergency or panic hardware.

Briton Lever Operated Outside Access Device

The Briton 1413/LE lever operated outside access device is supplied with fixings suitable for both timber and metal doors between 40-70mm thick.

Alpha Emergency Key Boxes

Alpha emergency keyboxes are designed to store emergency escape keys in a central location that can be accessed by breaking the glass face in an emergency. Available with key lock or replaceable door seal.

Keyguard Key Boxes

The Keyguard provides secure but accessible storage of emergency door keys. Fitted with a snatch-off plastic window, the Keyguard is easy to open in an emergency - no need for a hammer.

Plastic Fronted "Break Glass" Keybox

Plastic fronted keybox constructed from durable ABS plastic with a screen printed "break glass" plastic cover. Ideal for areas where it is essential to have keys for an emergency exit door readily available

Break Glass Keybox Printed Glass

An excellent and inexpensive way to protect emergency keys from theft or wrongful use while ensuring that keys remain visible as well as available in case of an emergency.

STI Exit Stopper Door Alarms

The STI exit stopper door alarms are designed to be fitted to fire exits or fire doors and alert staff and security to the opening of the door, sounding at 95dB or 108dB (switchable). The exit stoppers are available in two versions for use on single or double doors and also have optional remote sounders for doors that are in inaudible locations.

Safety Technology
International Ltd

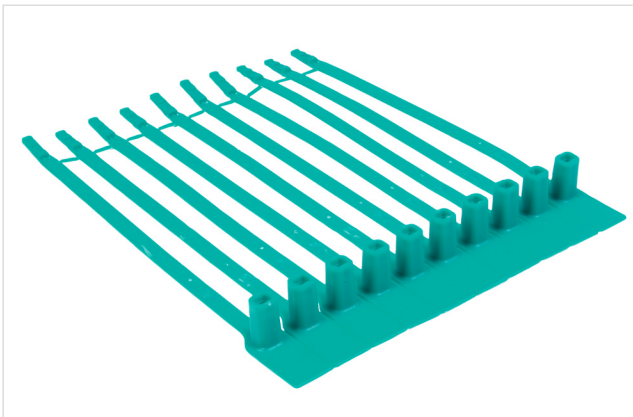

Sigma Smart+Shield Emergency Exit Alarm

The Smart+Shield from Sigma is a cost-effective deterrent for the misuse of emergency exits, combining a universally recognised “stop sign” design with an alarm of up to 95dB.

Exitguard Fire Door Security Alarm

Available with key or keypad override, the Exitguard is fitted with an integral piezoelectric sounder that produces up to 108dB and offers security for fire doors in places such as supermarkets, hotels and restaurants, etc.

Fire Exit Security Seals (10 pack)

The security seal is designed to be looped around e.g. a panic bar on an emergency exit and is closed in the same way as a cable tie. It adds additional security but can be easily broken when the panic bar is pushed open.

Cooper Bolt Door Alarm

These Cooper Bolt vertical and horizontal door alarms are easy to install on doors that should have restricted access, alarming if the door is used and only silenced by the authorised key holder.

Access Control Maglock Kit with Keypad

Designed to provide secure access control to a building, the Deedlock access kit consists of a power supply, IP68 rated keypad and 12V electric release strike.

Access Control Maglock Kit with Push-Button, Keypad and Call Point

This Deedlock access control kit includes three devices that enable entry and exit from a building by releasing an electromagnetic lock.

Access Control Maglock with Proximity Kit

The proximity reader included in the Deedlock access control kit uses contactless technology, allowing occupants to gain entry into a building using fobs.

Access Control Maglock Proximity Kit with Fob, Keypad, Switch & Call Point

Supplied with an electromagnetic lock and power supply unit, proximity reader, exit button and emergency manual call point.

Fireproof Safes & Storage

Pages 75 - 90

We supply industry leading fireproof safes, fireproof boxes, flammable liquid cabinets and a range of other storage solutions.

Fire and Waterproof Box for Paper & Digital Media (A4) - Phoenix FS0352C

Constructed from a light but durable scratch resistant ABS polymer material, the chest features a built in carry handle which makes it easy to transport.

Blazepak Fire Resistant Wallet

Fire resistant wallet designed to help protect important documentation against temperatures of up to 400°C. The Blazepak is made of insulated glass needlemat fibre, with an aluminised skin which repels water and reflects heat.

Low Cost Delivery

We will always offer the lowest possible shipping prices for all of the products we supply.

Flammable Liquid Cabinets

Our flammable liquid storage cabinets are made of 0.9mm thick welded steel and are supplied in a highly visible yellow powder coated finish. Designed specifically for the storage of flammable liquids, each cabinet is supplied with a “Highly Flammable” warning label as well as adjustable perforated shelves so that any spillages can leak through to the removable sump at the bottom of the cabinet.

Model	Weight	No. Of Shelves	External (HxWxD)

CKSLH194	45kg	1	1000x915x459mm
CKSLH894	60kg	3	1830x915x459mm

Phoenix Secure Key Stores - Combination Lock

Secure, wall mounted key stores, ideal for storing spare keys or access cards. Fitted with combination locks allowing authorised persons access at all times.

Phoenix Electron Key Safes - KS0030E Series

The KS0030E series key safes from Phoenix are available in 3 different sizes, feature a key deposit slot and can hold between 30-144 keys.

Metal Fire Safety Documents Cabinets

Designed to accommodate A4 sized ring binders, these metal document cabinets are ideal for storing fire safety log books and servicing records.

Emergency Lighting & Exit Signs

Pages 91 - 96

Our range of UK manufactured emergency lights and illuminated fire exit signs are perfect for lighting up evacuation routes.

Emergency Bulkhead Lights	92
Designer Emergency Lighting	93
Illuminated Fire Exit Signs	95
Emergency Spotlights	96
Emergency Strip Lights	96

Eden Emergency Bulkhead Light - 8W or LED

The Eden bulkhead can be installed in maintained or non-maintained operation, and its IP65 weatherproof rating makes it suitable for both indoor and outdoor applications.

Arc Emergency Bulkhead Light - 8W or LED

Manufactured in the UK and Kitemarked to BS 60598-2-22 (non-maintained version), the Arc bulkhead is a high quality emergency light with IP65 (weatherproof) rating.

Calabor Recessed Emergency Bulkhead Light - 8W or LED

Requiring a ceiling depth of only 90mm, the Calabor CAL8 emergency bulkhead light is a fully recessed 8W or LED unit with a 275 or 145 lumen emergency output.

Dyode Recessed Emergency Down Light - LED

Dyode is an unobtrusive, recessed emergency down light fitting that uses a low maintenance, high performance LED, and is available in maintained or non-maintained operation.

Iona Stylish Square Emergency Light - 28W, 38W or LED

Suitable for both internal and external use, the Iona is a robust diecast emergency light supplied in a black or silver/grey finish.

Leah Designer Round Emergency Light - 28W, 38W or LED

The Leah is a robust, high performance emergency light designed for versatility thanks to an IP65 rating, making it suitable for both indoor and outdoor usage.

Meled Stylish Round Recessed Emergency Light - LED

The Meled range of emergency lights offer a great solution for indoor installations where the style of the lights and how they fit with their environment is a key consideration.

Mezzina IP65 Round Emergency Light - 28W or LED

With a small, low-profile circular design this light can be installed almost anywhere, including outdoors due to its IP65 weatherproof rating.

Celebrating 30 years
of UK manufactured
emergency lighting

Pico Wall Mounted Fire Exit Sign - 8W or LED

The Pico fire exit sign has a reliable lamp lifespan of approximately 50,000 hours, and can be installed in either maintained or non-maintained operation.

Calibor Recessed Fire Exit Sign - LED

The Calabor exit sign is a fully recessed fitting with LED lamps and edge-lit legend panel, available with four directional arrow options.

Romney Hanging Fire Exit Sign - LED

Ideal for installing in corridors and escape routes, the Romney fire exit sign is a ceiling mounted unit with LED lamps and hanging single/double sided legend panel.

Savona Chain Suspended Hanging Fire Exit Sign - 8W or LED

The Savona fire exit sign is available in maintained or non-maintained operation, and features a single sided legend panel available in five different versions.

Twin-Spot Economy Emergency Spotlight - 28W or LED

Ideal for large areas requiring emergency lighting, the economy emergency twin spot is a non-maintained unit providing 3 hours of emergency illumination.

Emergency LED Floodlight with PIR Motion Activation - LED

Ideal for dimly lit entrance/exits, this 50W LED floodlight contains a 3hr back-up battery to ensure that it continues to light your escape in the event of an emergency.

Moston 4ft Emergency Strip Light - LED

The Moston 4ft emergency strip light is a modern take on traditional strip lighting and utilises LED technology to provide reduced power consumption.

Neath 4ft & 5ft Emergency Strip Light - LED

The Neath is a powerful LED strip light ideal for commercial and light industrial use, combining a tough steel body with an IP43 ingress rating.

Fire Safety & Site Safety Signs

Pages 97 - 102

Photoluminescent signs glow in the dark to increase visibility of important safety information and highlight equipment location.

Fire Extinguisher ID Signs	98
Fire Exit Signs	99
Fire Action Signs	100
Fire Equipment Signs	101
Evacuation & First Aid Signs	102

Fire Exit Signs from JALITE

JALITE photoluminescent rigid plastic fire exit signs assist in the identification of the escape route, helping to lead people to their nearest fire exit. A fire exit route provides an alternative route to the way occupants would normally leave the building. Available in three sizes: T, K and J.

Code	Dimensions	Viewing Distance
T	120x340mm	17 metres
K	150x400mm	22 metres
J	200x450mm	30 metres

HTM 65 NHS Fire Exit Signs

Jalite HTM escape route signs are designed in accordance with the Health Technical Memorandum (HTM) to satisfy the requirements of the National Health Trust (NHS) estate.

White Rigid Fire Exit Signs

White rigid signs are designed to clearly indicate directions to the nearest exits and can be used where there is a sufficient degree of emergency lighting.

Fire Action Signs from Jalite

It is important that occupants of a building know what to do in the event of a fire. Fire action notices suitably positioned at fire alarm call points will provide occupants with a constant reminder of the procedures to be followed. Graphical symbols have been included to aid comprehensibility and understanding.

Please Note: All of the fire action signs are of the same size but the text varies depending on the version chosen.

Fire action

1. Operate nearest fire alarm.

2. Leave building by the nearest exit.

3. Report to the assembly point.

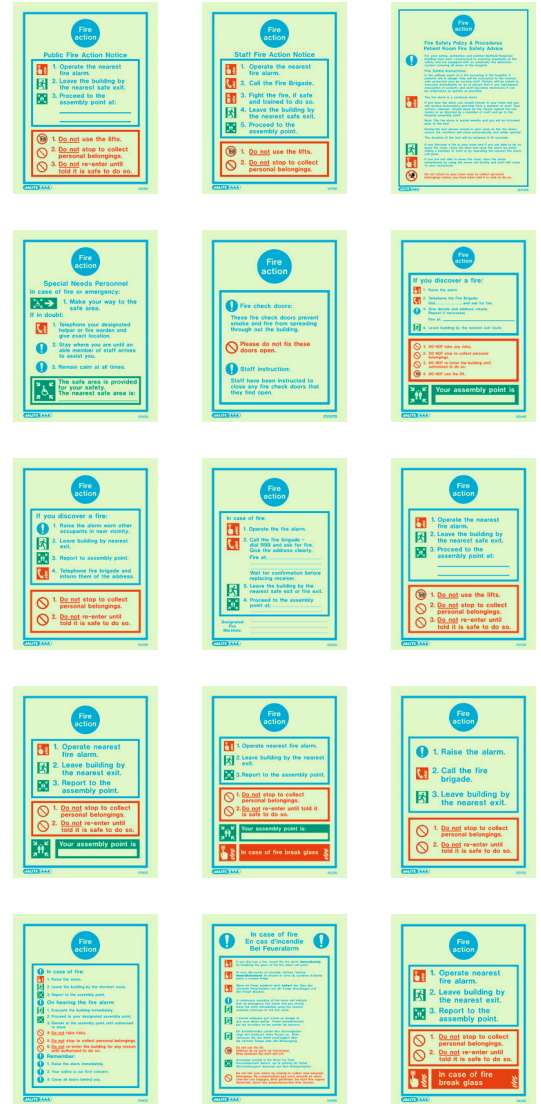

1. DO NOT stop to collect personal belongings.

2. DO NOT re-enter until told it is safe to do so.

JALITE
5414D

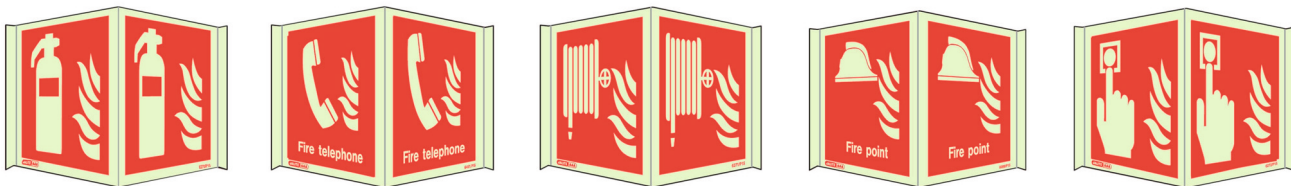

Fire Equipment Signs

Communication is key to any risk assessment and occupants should be aware of the location of fire equipment and alarm points. This range of fire equipment signs from JALITE are manufactured from photoluminescent (glow-in-the-dark) material to make them visible in total darkness.

Panoramic Fire Equipment ID Signs

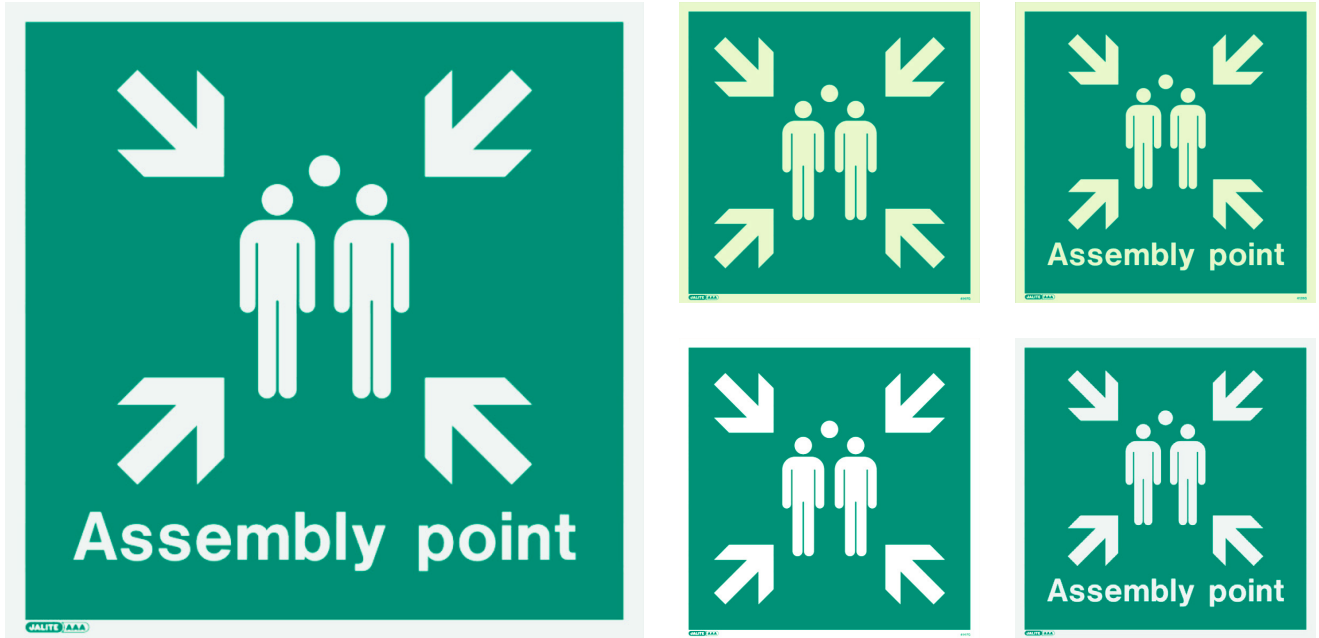

Fire fighting equipment signs manufactured from photoluminescent (glow-in-the-dark) rigid PVC plastic. These signs are designed to be viewable from any angle and visible in total darkness. Available with or without text, the panoramic photoluminescent fire fighting signs are available in a range of equipment options.

Assembly Area Signs

Jalite assembly area signs are suitable for highlighting and identifying safe assembly points. These durable, rigid plastic signs are available with or without "Assembly point" text and you can choose from photoluminescent (glow in the dark) or white finish. A large, aluminium version is also available.

Additional Signage

Safelincs carries a range of signage, from first aid signs, general safety signs and evacuation chair signs, to HSE posters and photoluminescent floor markings. Please visit our site for more information.

Fire Escape & Evacuation

Pages 103 - 120

Supplying site alarms, ladders, fire protection escape hoods, evacuation chairs and a variety of other evacuation solutions.

Fire Escape Ladders	104 - 105
Evacuation Chutes	106
Fall Arrest Systems	107
Evacuation Chairs	108 - 111

Fire Escape Hoods & Masks	115 - 116
Site Alarms & Accessories	117 - 120

Saffold Fold-Out Fire Escape Ladder

Saffold fire escape ladders are discreet, compact, easy to use fold-out ladders that are permanently fitted. Quickly and simply opened, the Saffold ladder is perfect for evacuation in an emergency.

The ladder is fixed to the external wall of a building and can be opened by an anti-tamper release pin located at the top. When not in use, the low-profile design of the ladder and the locking pin at the top of the ladder deter potential vandals and prevent unauthorised use of the ladder from the bottom.

Innovative Folding Mechanism

In an emergency this permanently installed fire escape ladder changes from a slimline, unobtrusive feature into a safe and sturdy fire escape ladder.

The anti-tamper locking pins are designed for quick release during emergency situations but also provide protection by eliminating unauthorised access from ground level.

Once the pin is released, the ladder can be unfolded to create a stable and structurally sound means of escape.

The Saffold ladder is manufactured in the UK, has been tested to BS EN 131-2:2010 by SGS, one of the UK's leading certification bodies, and carries a 15 year warranty.

Saffold
Foldout Ladder

EasyScape Portable Fire Escape Ladder

This ladder is rolled up with a fire retardant plastic sheet separating the layers, allowing tangle free, rapid deployment. In an emergency, the ladder is simply clipped into eyebolts that are installed permanently underneath the window.

With the option to purchase additional bolt fitting sets, the ladder can be used in a range of locations depending upon the most suitable evacuation route. The bolt sets included with the ladder are suitable for masonry but we do also offer timber bolt sets suitable for fixing it into wood.

Why Choose a Portable Ladder?

Fire escapes in the home should not mean installation of fixed, bulky ladders that detract from the appearance of your home, and now it doesn't. The EasyScape is a roll-out ladder that is not only easy to deploy but also tangle free due to its innovative design.

The EasyScape fire escape ladder can also be rolled up after use, ready for the next time it needs to be deployed. By having the ladder stored separately to the fixing bolts in the wall, the ladder does not take up room space or look as unattractive as a traditional internal fixed installation.

The EasyScape ladders are manufactured in the UK and carry a 5 year warranty exclusive to Safelincs.

Patent Pending 1005910.3

 EasyScape

EvacChute Fire Evacuation Chute for High Rise Buildings

EvacChute is designed to provide a rapid means of evacuation from high rise buildings when standard escape routes cannot be used. It is manufactured in Germany with fire-retardant fabrics and high-strength, load-bearing belts to allow a load of 14,500kg.

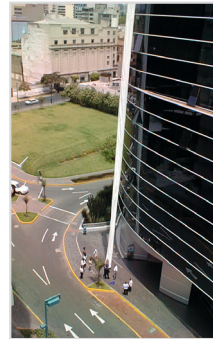

EvacChute can be installed under windows or on roofs up to 120 metres above ground level. The specially designed internal spiral structure of the chute ensures a safe descent speed of 2 metres per second.

The deployed chute features a safe entry tunnel, which obscures the height of the chute and prevents users from panicking.

The chute is TÜV Certified and guaranteed for 15 years when serviced annually by our specialist engineers. The EvacChute is ideal for tall buildings or buildings with an insufficient number of escape staircases.

Key Features

- Suitable for children over 12kg (approx. 2 years old), disabled, pregnant and unconscious people.
- Constructed from flame-retardant fabric (DIN 4102 class B1) as standard
- 5 high-strength belts support a load of 14,500kg
- TÜV tested and approved

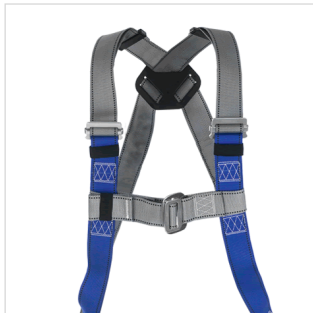

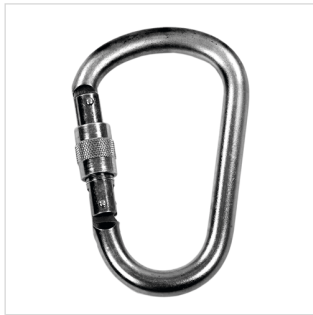

evacchute

Fall Arrest Systems from IKAR GB

Ikar GB fall arrest systems are designed to enable safe and controlled descent from a building in the event of an emergency. All systems comply with the relevant European Standards, are available in either 16 or 30 metre lengths and are designed to be used with a fixed anchorage point, carabiners and safety harnesses.

Evac+Chair 300H MK4 Evacuation Chair

The EVAC+CHAIR Emergency Evacuation Chair enables evacuation of less mobile persons in emergency situations. The chair has the ability to easily and smoothly transfer a person down a flight of stairs with only a single operator. As well as providing a suitable solution to aid evacuation, the Evac+Chair also helps businesses meet their legal obligations.

Evacuation Chairs

EVAC+CHAIR[®]

The World's Number
One Stairway
Evacuation Chair

EVAC+CHAIR 500 Evacuation Chair

The Evac+Chair 500 evacuation chair is lightweight, easy to use, provides the ideal solution for escape down steep stairways and has a number of features to benefit both the user and the chair operators.

EVAC+CHAIR 600H Evacuation Chair

The Evac+Chair 600H is ideal for use in locations with difficult access. Supplied with two additional handles, the 600H evacuation chair is suitable for up to 4 operators during use in the event of emergency.

EVAC+CHAIR IBEX TranSeat 700H

The IBEX Transeat has the ability to both descend and ascend stairways with ease during an emergency escape situation. Many commercial and residential premises have stairs which lead to the escape access of a building.

EVAC+CHAIR 110H Evacuation Chair

The EVAC+CHAIR 110 is designed for narrow spaces, which may otherwise prove problematic. It is effectively operated by a single operator.

CarryLite Transit Chair

The CarryLite Transit Chair is ideal for a single user to assist people with poor mobility to safely exit a single level building in the event of an emergency. The chair's occupant is secured with safety restraints and a sling-style seat.

Air+Chair Patient Transit Chair

The Air+Chair patient transit chair is designed for tight and busy areas. The chair's narrow design enables it to pass down aeroplane and train aisles comfortably and the sturdy design of the chair means it can handle a 250kg payload.

Servicare EVAC+CHAIR Servicing

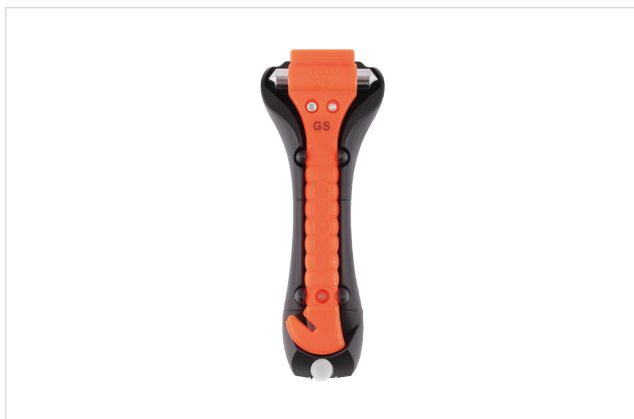

Servicare is the annual servicing of EVAC+CHAIR evacuation chairs which ensures safe operation for emergency use, and helps employers meet their legal requirements under PUWER.

A large white question mark inside a white circle on a dark blue background.

Did You Know?

Evacuation Chairs are classified as class 1 medical devices and should be serviced and maintained regularly.

Life Hammer Emergency Window Hammer and Cutter

The Life Hammer is suitable for breaking single-pane windows. It is a well established product with a reputation for good quality and reliability.

Lifeaxe Emergency Vehicle Hammer with Optional Cutter

The Lifeaxe vehicle hammer acts as an essential tool for escape in the event of an emergency or accident. It is easy to use and is available with an optional seat belt blade.

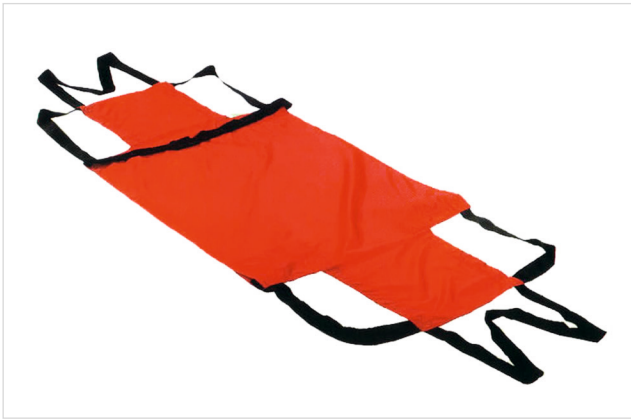

Lifeaxe Emergency Window Hammer for Double Glazing

The Lifeaxe emergency hammer is used for breaking double glazed windows in an emergency situation to create an escape route from a building or vehicle.

Low Cost Delivery

We will always offer the lowest possible shipping prices for all of the products we supply.

Harvest Healthcare Evacuation Sheet

The Harvest Healthcare evacuation sheet is an effective way of transporting non-mobile patients in emergency situations. The silicone coating on the bottom of the sheet enables quick, controlled and accurate manoeuvrability.

Thorpe Mill Evacuation Sheet

This emergency evacuation sheet fixes permanently to the bottom of a flexible foam mattress by means of strong elastics, enabling the mattress to act as an emergency sledge, maneuvering through doorways and over steps.

Hospital Aids Ski Sheet

The Ski Sheet is an industry recognised evacuation device used to transfer patients out of a building in an emergency without moving them from their bed.

Thorpe Mill Evacuation Sledge

The wall mounted Emergency Evacuation Sledge from UK manufacturer Thorpe Mill allows the smooth transfer of disabled patients over any surface, even concrete or stairs.

Spectrum Healthcare AlbacMat Flexible Evacuation Stretcher

The AlbacMat flexible stretcher is used for the evacuation of immobile persons in the event of a fire or emergency.

ParAid Vacuum Mattress

The vacuum mattress from ParAid is an innovative solution to keeping a patient immobile during transportation. The lightweight polymer bag is filled with tiny polystyrene balls, similar to those found in a bean bag.

Hospital Aids Ski Pad & Storage Bag

The tough slippery Vinyl coated material base of the Ski Pad enables patients to be moved easily over virtually any surface - indoors or outdoors. The Ski Pad is the only product on the market to be NHS approved.

Bariatric EvacMat

Designed for the movement of overweight and obese patients, the Bariatric EvacMat provides a safe evacuation solution in the event of an emergency. Strong, slippery base allows movement over indoor and outdoor surfaces.

Dräger Parat 5510 Fire Escape Hood

The Dräger Parat 5510 is one of the best known fire escape hoods on the market. With a combined gas and particle filter the 5510 provides a minimum of 15 minutes protection from fire-related toxic gases. The hoods are designed for use by any user being universally sized with a flexible neck seal and an automatically adjusting internal head harness.

Dräger

☎ 0800 612 6537

🖱 www.safelincs.co.uk

Dräger Parat 5520 Fire Escape Hood

Designed to provide protection from toxic gases, vapours and particles produced during a fire, the Dräger Parat 5520 is a full head fire escape hood supplied in a handy IP5X rated soft pack for protection against dust.

Dräger Parat 5530 Fire Escape Hood

Fitted with a high performance CO-P2 filter, the Dräger Parat 5530 fire escape hood provides 15 minutes protection against fire-related toxic gases, vapours and particles including carbon monoxide.

Dräger Parat 3200 Fire Escape Mask

The Parat 3200 fire escape air filter mask incorporates a mouthpiece and nose clip to reduce the chances of inhaling toxic gases. This mask offers 15 minutes of protection from poisonous gases from fires (excluding carbon monoxide).

Dräger Parat 3100 Fire Escape Mask

The Parat 3100 half mask fire escape mask provides 15 minutes of protection from the toxic gases produced by fires (excluding carbon monoxide). Requires no maintenance during its 4 year service life.

Evacuator Sitemaster Push Button Site Alarm

The Evacuator Sitemaster sounds a 110dB alarm when manually activated using the push button located on the front of the unit.

Evacuator Sitemaster Call Point Site Alarm

With a 110dB sound output, this 9V battery operated Evacuator Sitemaster is activated via a call point located at the front of the device.

Evacuator Site Guard - Call Point Site Alarm

The Site Guard Plus is an easily installed, simple to operate, reliable site alarm featuring an extremely loud 118dB sounder and is manufactured to a high specification.

Evacuator Site Guard - Push Button Site Alarm

These units require no external wiring, feature an extremely loud 118dB sounder and are manufactured using high quality components.

EVACUATOR

UK Manufactured Site Alarms

Evacuator Synergy Base Station

The Evacuator Synergy RF base station site alarm requires no cabling and can be wirelessly interconnected with up to 39 other call point, sounder/strobe and smoke Synergy RF devices within a single system.

Evacuator Synergy Call Point

The site alarm features a call point for manual activation and a loud 110dB sounder. Its durable construction is IP55 rated and the unit requires no wiring whatsoever.

Evacuator Synergy Sounder & Strobe

The sounder/strobe unit has built-in radio frequency technology, allowing up to 40 site alarms to be wirelessly interlinked. Upon system activation, the sounder/strobe emits a 110dB alarm and provides visual warning.

Evacuator Synergy Smoke or Heat Detector

The Evacuator Synergy RF smoke detector is the ideal addition to the Synergy wireless manual site alarm system, providing automatic detection for fast flaming fires.

UltraFire Evacuator Site Alarm

Designed for harsh conditions, such as building sites, the UltraFire Evacuator is an IP65 rated site alarm that features a combined strobe and 108dB sounder. Easily reset using a secure 'swipe fob', these alarms are simple to install, have a long battery life and minimum maintenance requirements.

UltraFire

Passive Fire Protection

Pages 121 - 126

We offer a wide range of passive fire, flame retardant products and anti-arson solutions to help protect your property.

Penetration Protection	122
Electrical Protection	123
Intumescent Grilles	124
Intumescent Sealants & Sprays	125
Arson Prevention & Protection	126

Astroflame Intumescent Pipe Collars

Astroflame intumescent pipe collars are designed to seal PVC pipes in the event of a fire (can also be used on steel pipes to achieve a cooling effect). Typical installations include soil, waste and other service applications.

Astroflame Thermal Pipe Sleeve

A thermal pipe sleeve is an economical solution to retaining fire integrity when passing pipework through fire rated constructions. Suitable for plastic, copper and mild steel pipes.

Astroflame Intumescent Pipe Wraps

Astroflame intumescent pipe wraps are suitable for PVC pipes which penetrate masonry or concrete walls and floors. Astroflame intumescent pipe wraps can also be used on steel pipes to achieve a cooling effect.

Astroflame Fire Resistant Batt & Astroflame Mastic Coating

Constructed from a mineral fibre core coated on both sides with Astroflame mastic, the Astroflame fire batt is specially designed to seal service penetrations in walls and floors.

Astroflame Intumescent Socket Box Insert

Intumescent socket box inserts are designed to provide maximum protection for penetrations created in structures by the introduction of single/double switches and sockets.

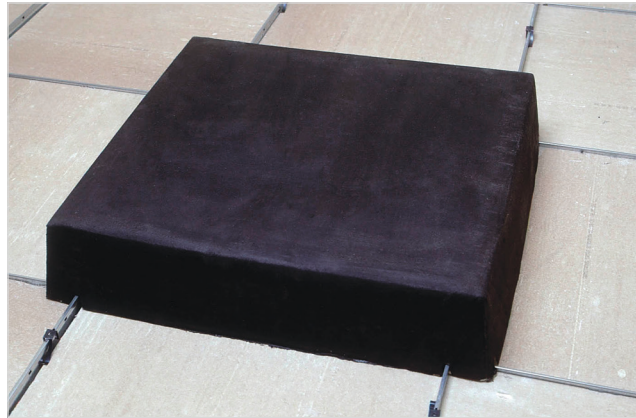

Astroflame Intumescent Fire Pillows - 120 Minute Fire Rated

Constructed from a hard wearing specially treated glass cloth and filled with a mixture of mineral fibre with reactive expansion agents.

Astroflame 2 Hour Fire Rated Intumescent Duct Wrap

These flexible intumescent strips are designed for use with plastic ducting that pass through walls.

Astroflame 60 Minute Fire Rated Luminaire Covers

Astroflame luminaire covers are designed to maintain the fire integrity of ceilings that have had tiles removed and replaced by recessed lighting.

Fire Rated Intumescent Air Transfer Grilles

In normal use the grille system allows air to be circulated freely throughout a building.

The system is designed so that the grille swells when exposed to heat from a fire and provides a fire barrier to restrict the passage of hot gases.

Ideal for use with fire rated doors and walls, these kits are supplied in three parts: 2 x face plates and 1 x intumescent grille. They are available in a range of sizes and three colours: white, silver and beige.

These intumescent transfer grilles are tested to BS 476-22:1987 by IFC Certification Ltd.

When installed correctly in accordance with the installation procedure, these intumescent grilles are guaranteed for a period of 10 years.

Intumescent Grilles

150x300mm	PPATGFP1503	PPATGFPS1503	PPATGFPB1503
225x225mm	PPATGFP2250	PPATGFPS2250	PPATGFPB2250
300x300mm	PPATGFP1300	PPATGFPS1300	PPATGFPB1300

Envirograf 3-2-1 Fire Retardant Spray

Our impregnation sprays protect decorations and fabric against catching fire (e.g. Christmas trees and decorations as well as soft furnishing etc.). This is particularly important in schools, hospitals and areas with vulnerable people.

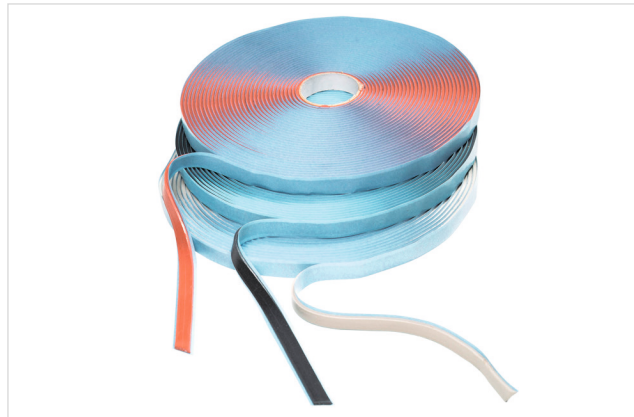

Astroflame Intumescent Mastic

Ideally suited for sealing and maintaining a structure's fire and acoustic integrity when penetrating with pipes, etc. Astroflame intumescent mastic is designed for sealing gaps around fire doors, sealing joints and irregular holes.

Astroflame Fire Rated Foam

Astroflame fire rated foam is designed to maintain the integrity of a fire wall by filling the gaps in joints, around fire door frames, window frames and service penetrations. The foam will also stop the transmission of smoke.

Astroflame Intumescent Glazing Tape

Designed to seal fire resistant glazing in partitions and wooden fire doors. When exposed to high temperatures during a fire, the intumescent material expands to stop smoke and heat from passing through the gaps.

Mailguard Fire Protection Bag

Designed for internal installation, covering the inside of your letterbox, the bag collects mail and genuine items that can be removed using the zip at the bottom of the bag. Available with or without a built-in extinguisher tube.

Anti-Arson Mailbox with Extinguisher

The solution to the ever increasing crime of arson, Mailsafe will contain, detect and extinguish a fire in less than 15 seconds, before it has the chance to spread. Replacement extinguisher tubes are readily available.

Wall Mounted Anti-Arson Mailbox

The Mailsafe is easy to install and will activate automatically in the event of an arson attack through the letterbox. Comes in white powder coated finish.

Mailsafe Anti-Arson Mailbox Plus

Offering protection for homes, businesses, schools and places of worship all of which are under increasing risk from arson attacks, the Mailbox Plus is constructed from sheet steel and features an internal fire extinguisher tube.

St John Ambulance BS 8599-1:2011 Compliant First Aid Kits

Our range of St John Ambulance first aid kits have been re-designed with new and improved contents. We offer kits fully compliant with the latest British Standards as well as kits designed for personal or domestic use where the contents are more suited to common recurring injuries. We also offer a complete range of first aid refill and replacement components.

The British Standard BS 8599-1:2011 was published in June 2011 and explicitly states the contents and the quantities of equipment that a first aid kit must include to meet the legislation. BS 8599-1:2011 kits are available in sizes to suit up to 25 persons, up to 50 persons and up to 100 persons. All kits can be supplied in either a tough hard plastic alpha first aid box or in a durable material soft pouch depending on your requirement and where the kit is to be stored.

Providing first aid and
medical care since 1887

St John Ambulance Catering Kits

The new BS 8599-1 compliant catering kits from St John Ambulance contain a broader range of contents designed to deal with a larger variety of injuries that can occur in a busy kitchen environment.

St John Ambulance Burns Kits

The St John Ambulance burn kits contain a range of products designed to provide fast acting, quick relief in an emergency. Suitable for use at home or in the workplace, the burn kit has a durable hard case or soft pouch cover.

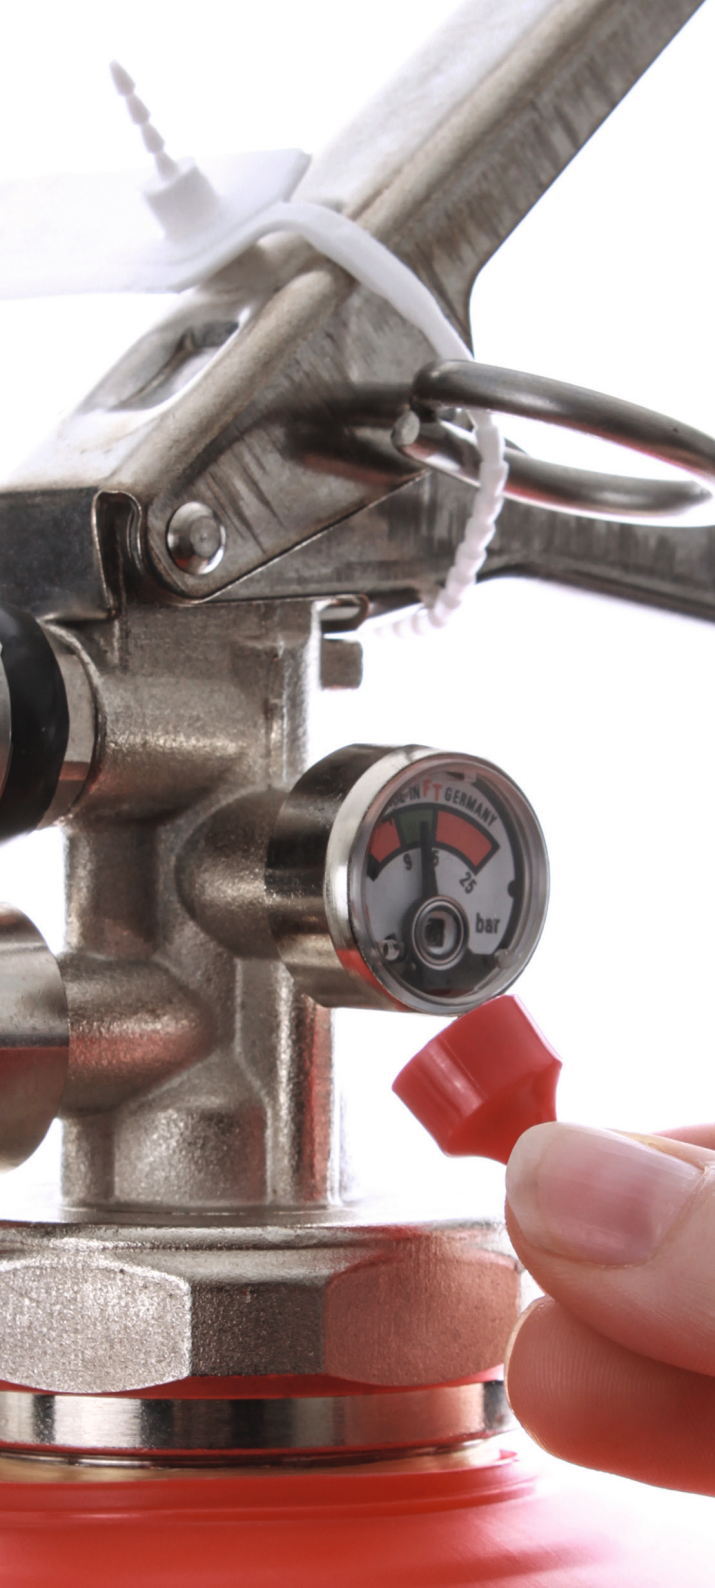

St John Ambulance Biohazard Kits

St John Ambulance biohazard kits are designed to deal with spillages that pose a sanitary or infectious hazard. The kit contains everything you need to safely contain and dispose of the spillage and disinfect the soiled area.

St John Ambulance Eyewash Kit

The St John Ambulance signature eyewash kit is designed for small companies and light industrial use. This kit comprises of two 500ml bottles of sterile eye wash solution, two eye pads, a wall bracket and a handy mirror.

Services & Training Courses

Fire Risk Assessments	143
Fire Extinguisher Contracts	144
PAT Testing	144
Fire Safety Log Books	145
Training Courses	146 - 147

Fire Extinguisher Servicing

Safelincs will make servicing your fire extinguishers an effortless and cost-efficient process. Our nationwide BAFE approved service engineers will carry out your servicing in accordance to BS 5306-3 and we will provide you with all the relevant legal documentation you need to show that your fire extinguishers have been serviced and that you comply with your legal obligations. Servicing prices include all the basic spare parts required for an annual fire extinguisher service.

Clear Pricing Structure

We have a clear pricing structure and all our prices are available upfront.

No Hidden Charges

Our prices include all basic spare parts and we have no hidden charges.

Fully Certified Engineers

All our fire extinguisher engineers are fully trained and BAFE certified.

There is no need for a contract with us. We are confident that the service you receive from our competent engineers and our competitive pricing will keep you returning. Our friendly servicing team will automatically contact you a year on from your last service to remind you to re-book your annual service and will help you to keep up with your fire safety obligations. Should you wish to take out a contract, please visit page 144.

Fire Extinguisher Site Survey

If you have a new or redeveloped site and are unsure which fire extinguishers and fire blankets you require, we can send a service engineer to carry out a site survey. Our engineer will then recommend the correct extinguishers and equipment needed, according to the relevant British Standards.

Fire Alarm Servicing

Safelincs fire alarm servicing is available across the UK, with all-inclusive fixed rates. Our trained nationwide engineers will carry out your servicing in accordance with BS 5839-1 and offer you a cost-effective way to ensure your sounders will activate if needed, giving you peace of mind. We offer an emergency 24-hour response call-out service.

Alarm Test Certification

We will provide you with all the relevant legal certification you need.

Fully Certified Engineers

All our engineers are fully certified and carry the relevant documentation.

Fire Risk Assessments

Since the introduction of the Regulatory Reform (Fire Safety) Order in 2005, fire risk assessments must be carried out in businesses and organisations. The assessments identify potential fire risks and outline solutions. Most companies do not have the requisite skills to assess the risks so we can carry out the fire risk assessment for you. Our fire risk assessors will visit you and carry out a thorough assessment of your premises.

Comprehensive Reports

Our Fire Risk Assessment reports provide in-depth analysis and solutions.

Fully Qualified Team

All of our FRA officers are fully qualified and trained to the highest standards.

Extinguisher Contracts

We understand that business needs vary and we can offer bespoke contracts to suit you and your requirements. With clear, comprehensive prices Safelincs will help you to meet your fire extinguisher maintenance obligations. Our team will take care of the servicing and discharge testing when required and will provide any replacement parts or units when required. Let us take the strain and call us for a no obligation quote today!

No Obligation Quotes

Our friendly servicing team will provide you with a full quote upfront.

Clear Pricing Structure

We have a clear pricing structure and all of our prices are clearly visible.

PAT Testing

It is essential to have your electrical equipment PAT tested to ensure they are safe to use and do not present a potential fire hazard. Common items that are tested include computers, monitors, printers, TVs, phone chargers, back-up power supplies, photocopiers, microwaves etc. We have a clear and competitive pricing structure and generate a full asset report at the end of the testing process.

Transparent Pricing

Our prices are 100% transparent and include the engineer's call out charge.

Fully Qualified Team

All of our PAT test engineers are certified to C&G 2377 and NICEIC.

Free Online Fire Safety Logbook

Our free online fire safety log book replaces paper-based fire safety log books. It is easy to use, it will automatically send you reminders for checks that need to be carried out and it will allow you to print out a copy if you want to have a paper backup. Your data is stored securely on our servers and is fully protected in accordance with the Data Protection Act. The logbook is also suitable for organisations with multiple sites.

The screenshot shows the Safelincs Fire Safety Log Book interface. The header includes the Safelincs logo and the title 'Fire Safety Log Book for COMPANY NAME'. Below the header, there are navigation buttons for 'User Settings', 'Fire Safety Advice', and 'Logout'. A search bar is present for 'Search log book'. The main content area is divided into several sections: 'Location Overview' with details for 'Organisation / Company: COMPANY NAME', 'Responsible Person: RESPONSIBLE PERSON', 'Date (from): 27/09/2017', and 'Last Update: 27/09/2017'; 'Outstanding Tasks' with a table showing 'Fire Safety Drills' as 'Incomplete' with a 'Complete' button; and 'Upcoming Tasks / Activities' with a table showing 'Fire Extinguisher Tests (Annual Inspection)' and 'Fire Alarm Tests (Engineer Service)' both due in 2 days, with 'Remedy now' links. A sidebar on the left contains various test categories like 'Fire Alarm Tests', 'Fire Extinguisher Tests', 'Fire Hose Tests', 'Emergency Lighting Tests', 'Miscellaneous', 'Fire Safety Training', 'Fire Safety Drills', 'Fire Safety Links', 'About Log Book', and 'About RRO'. A 'Print Log Book' button is at the bottom left.

100% Safe & Secure

Your logbook will be stored securely on our servers. Even in the event of loss of your log book, we will always be able to retrieve a copy of your log book.

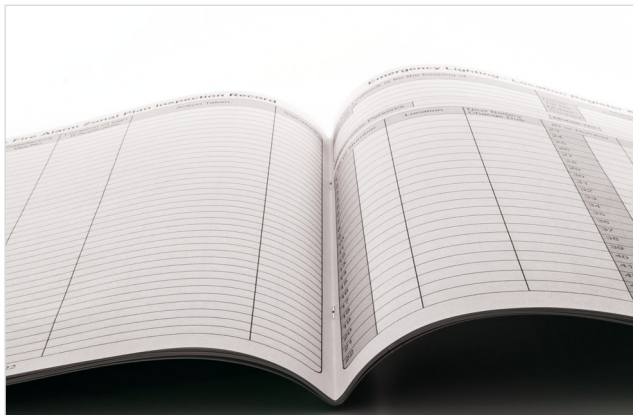

Customer Reminders

When a test or inspection is due, our logbook will send you an email reminder, making sure your log book is up to date.

Multiple Users

Manage which staff are responsible for different tests. Each staff member can have their own account and access level.

Fire Safety Logbook

For customers that prefer a traditional printed fire safety log book we offer a comprehensive A4 booklet that exceeds standard requirements by offering additional help, information and support to businesses.

- Easy to follow precautionary and maintenance guide
- Standard A4 size booklet
- Developed in conjunction with the fire brigade and fire safety officers

Fire Safety Training

We offer a range of certificated fire safety training courses, all carried out by qualified and experienced trainers. Our courses are held at regional training centres where participants can be booked in individually or we can hold dedicated training courses for between 6 - 12 delegates (depending on the course topic) at your own premises or a premises of your choice.

Fire Safety Awareness Training

Fire Safety Awareness training not only helps users to understand potential fire risks but also how to react to them. The course has been specifically designed to reduce the risk of fire through the promotion of fire safety awareness.

Fire Warden Training

The Fire Warden Training course has been specifically designed to reduce the risk of fire through the promotion of fire safety awareness and basic fire fighting equipment training for staff/individuals appointed as Fire Wardens.

Evacuation Chair Training

Evacuation chairs help to evacuate immobile or fragile people in an emergency down escape stairs. Correct handling of an evacuation chair is very important to avoid injury or strain.

Evacuation Sheet Training

Having the ability to move elderly and disabled people in an emergency without removing them from their bed is extremely beneficial. Evacuation sheets are designed for exactly that purpose.

Health and Safety Training

Health and Safety and First Aid training courses are carried out by our team of fully trained professionals and are all certificated. We hold courses at central regional venues where you can book individual places or we can come to a site of your choice and carry out a dedicated training session for you and your team (between 6 - 12 persons).

CIEH Health and Safety in the Workplace Training

This qualification will benefit those who are entering the workplace for the first time, as part of a work experience programme or who are in the early months of employment.

Safe Manual Handling Training

It's vital to train your staff so that they can move and lift heavy and large objects safely. Our Safe Manual Handling course provides the skills and knowledge to enable your staff to move objects without causing injury.

St John Ambulance First Aid Training and Refresher Courses

Keeping up to date with your first aid training is vital in today's modern working environment. Our certificated courses are designed to refresh staff of first aid skills.

AED and CPR Training

Having a fully working defibrillator unit will help to save the lives of people who suffer a cardiac arrest. Ensuring that your staff are trained and confident in using that defibrillator will increase the chances of survival considerably.
