

# Smoke Alarm

9V BATTERY POWERED

## Model Ei 105C Optical

- High sensitivity – responds to all standard fires Senses smoke using the light scatter principle, giving a quick response to visible smouldering fires
- Battery powered – 9V alkaline (supplied)
- Interconnect up to 12 other alarms
- Missing battery indicator
- Low battery warning
- Built in sounder
- Test button
- Kitemarked to BS5446-1:2000
- 5 year guarantee

## Product Description

The Ei105C is an Optical Smoke Alarm that runs on a 9V alkaline battery (supplied with the alarm).

It senses smoke using the light scatter principle, giving a quick response to visible smouldering fires

The Ei105C is easily installed and comes supplied with all necessary screw fixings.

When the battery is first connected, the alarm may sound for 2-3 seconds – **this is normal and means that the battery is connected correctly**

## Operation

- Interconnect up to 12 other alarms (Optical alarms Ei105C or Ionisation alarms Ei100C)- when one senses smoke, all alarm. Helps ensure warning will be heard throughout the house.
- The smoke detector will activate the built in sounder upon sensing smoke particles
- The smoke detector will automatically reset itself and silence the sounder when smoke particles are no longer present in the sensing chamber
- The built in sounder will provide a minimum sound output of 85dB at 3m
- The smoke detector has a built in warning flag to prevent installation of the detector without a battery fitted
- The "Test" button will perform a self test and sound the horn (it may take up to 10 seconds)
- The smoke detector will emit a beep every 40 seconds to indicate that the battery back up is depleted and needs replacing

# Model Ei105C Optical

## Technical Specification

<b>Sensor:</b>	Optical, uses light scatter from smoke particles	<b>Alarm:</b>	Piezoelectric-horn in unit
<b>Sensitivity:</b>	Complies with BS 5446 Part 1: 2000	<b>Alarm Sound Output:</b>	85dB (minimum) at 3m
<b>Airspeed:</b>	Essentially immune to the effect of airspeed.	<b>Temperature Range:</b>	0 to 40°C
<b>Button Test:</b>	Simulates the effect of smoke and checks chamber, electronics and horn.	<b>Humidity Range:</b>	0% to 90% Relative Humidity
<b>Supply Voltage:</b>	9V battery	<b>Fixing:</b>	Screw fixings supplied
		<b>Plastic material:</b>	UL94HB flame retardant
		<b>Dimensions:</b>	140x120x45 mm
		<b>Weight:</b>	204 grams
		<b>Warranty:</b>	5 year (limited) warranty
		<b>Approvals:</b>	Kitemarked to BS5446-1:2000, CE Approved

Specifications are subject to change

## Installation & Placement

Alarms should be placed in accordance with the general guidelines shown in the diagram above. These recommendations are based on the problem of areas of "dead air" close to corners of rooms and apexes of ceilings, which could result in the prevention of smoke reaching the smoke detector

Please consult the Instruction Leaflet supplied with the Ei105C for detailed instructions as to how to correctly install and position the smoke detector

### Important Precaution:

Do not install the actual smoke/heat alarm itself in new or renovated buildings until all work is completed (including floor coverings) and the building has been fully cleaned. (Excessive dust and debris from building work can contaminate the smoke chamber and cause problems, and it will also invalidate the guarantee). If it must be installed, cover it completely, particularly around the edges, with a dust cover (eg. a plastic bag), until all cleaning is finished..
