

# PORTABLE TWIN SPOT

The TSEP Light provides portable floodlighting for large areas.

Comprising a white, finished sheet steel enclosure and fitted with twin, high-efficiency flood beams utilising high output tungsten halogen lamps. It passes the 850°C hot-wire test, as defined by ICEL.

A handle on the top and switch at the side enables it to be used as a powerful light source and for temporary lighting.

The TSEP Light complies with the requirements of EN60598-2-22. The TSEP Light comes complete with batteries offering versatile lighting.
