- Up to 4 hours fire integrity
- Available in 4 standard sizes
- Easy to install & re-locate
- Removable for re-use
- For wall floor & ceiling penetrations
- Dustproof - safe for the work environment
- Certifire Approval

#### Product Description

Our fire pillows are manufactured from a hard wearing specially treated glass cloth filled with a mixture of mineral fibre and reactive expansion (intumescent) agents.

On exposure to high temperatures from a fire the intumescent material expands and then hardens to provide a complete and durable seal against the passage of fire, smoke and hot gases.

Intumescent Fire Pillows can be used for creating either temporary or permanent fire barriers. The fire pillows are ideal for sealing Cable Trunkings, Small, Medium and Large Cables, Cable Trays, Cable Ladders and Metallic Pipes that penetrate concrete, block, and masonry walls also tested in concrete floors.

Suitable for use in telephone exchanges, rooms and other areas where cable services are frequently modified.

### Product Description

These intumescent pillows have been independently tested in accordance with BS476: Part 20: 1987 and can provide up to 4 hours fire integrity.

### Product Availability

Available in 4 standard sizes to enable effective sealing in whatever size or shape of opening either in walls or floors.
