Surface Mount Pattress

Model Ei 127

- Surface mount Pattress
- For use with Ei140 and Ei160RC series Smoke and Heat Alarms
- Facilitates bulky wiring and conduits

Product Description

The Ei127 Pattress is designed to facilitate installation of bulky wiring and conduits.

The Ei127 Pattress is designed to be used in conjunction with Ei141/144/146/161RC/164RC/166RC Smoke and Heat Alarms.

The Ei127 Pattress is designed so that any of the alarms listed above will fit on top of the Ei127 (the Ei127 is specifically designed so that such alarms fitted with the Easi-Fit base will screw directly to the Ei127).

The Ei127 Pattress must only be used with one of the Smoke/Heat Alarms listed above – otherwise the unit will not comply with the mandatory safety regulations.

Operation

- Mount the unit in accordance with the siting instructions in the Smoke/Heat Alarm instruction leaflet
- After connecting all of the relevant wiring, simply screw the Smoke/Heat Alarm to the top of the Pattress

Model Ei127

Technical Specification

Supply Voltage:	240V AC	Fixing:	Screw fixings supplied
Battery back up:	No battery back up	Plastic material:	UL94VO flame retardant
Temperature Range:	0 to 40°C	Dimensions:	141mm x21mm
Humidity Range:	0% to 90% Relative Humidity	Weight:	105g
Interconnect:	Up to 12 interconnected Easi-Fit Mains Powered smoke or heat alarms, along with an Ei128 relay base	Warranty:	5 year (limited) warranty

Specifications are subject to change

Installation

Important Precaution:

Do not install the actual smoke/heat alarm itself in new or renovated buildings until all work is completed (including floor coverings) and the building has been fully cleaned. The wiring can be installed when appropriate. (Excessive dust and debris from building work can contaminate the smoke chamber and cause problems, and it will also invalidate the guarantee). If it must be installed, cover it completely, particularly around the edges, with a dust cover (eg. a plastic bag), until all cleaning is finished.. Connect wires to the unit as in wiring diagram. All wiring must comply with local codes.

Be very careful about correctly wiring the alarms as mixing Live and Neutral will blow/damage interconnected alarms
