

Dräger DrugCheck Drug detection test kits

The reliable method to prevent drug abuse in a cost-effective way. No matter whether you wish to detect current abuse with a saliva test or recent consumption with a urine test: the Dräger DrugCheck program offers you the right test.

SALIVA POCKET TESTS

The saliva test kits include everything you need for a quick on-site analysis. The kit contains an oral fluid collector for taking samples and a buffer for their preparation. Each box also contains hygienically packed gloves. No further equipment is needed to analyse the test. The results can be read directly from the test strip.

VISUAL ANALYSIS OF THE RESULTS

The test has worked and all results are available when the red control line appears on the test strip. You can now assess the test lines using the analysis list in the instructions for use.

ONLY 0.5 ML OF URINE REQUIRED TO DETECT UP TO TEN DRUGS SIMULTANEOUSLY

Only small amounts of fluid are required to carry out reliable tests. As little as 0.5 mL of urine are sufficient for a sample. Simply use a pipette and apply three drops directly to the test field. Dräger offers different urine test kits, suitable for the most frequent drug combinations. Select the test kit appropriate for your needs, depending on the substance you expect to detect and the time period you wish to check.

ADDITIONAL BENEFITS:

- manipulation-proof: urine test kits optionally contain a manipulation test to detect a manipulated urine sample (pH value, density, creatinine). Sampling for urine tests does not allow any manipulation.
- urine test kits: 99 % conformity with the GC/MS analysis of the urine
- Detection limits defined by the American SAMHSA institute.
- different limit values for one substance available
- manipulation-proof saliva tests

The urine test kit consists of a plastic cartridge with one or two test strips - depending on the type of substance to be detected.

The saliva test kit consists of a plastic cartridge with two test stripes specially designed for saliva, an oral fluid collector and a buffer.

ORDERING INFORMATION

DRÄGER DRUGCHECK 1200 UTK

Urine drug test, box with 50 test kits	Order No.
10 substance classes*	AMP (1000), BAR (300), BZO (300), COC (150), MET (1000), MTD (300), OPI (2000), PCP (25), PPX (300), THC (50)
8 substance classes*	AMP (1000), BAR (300), BZO (300), BUP (12.5), COC (300), OPI (300), MTD (300), THC (50)
6 substance classes*	AMP (1000), BZO (300), COC (300), MET (1000), OPI (2000), THC (50)
	AMP (1000), BZO (300), COC (300), MET (1000), OPI (2000), THC (50)+SVT**
	AMP (500), BZO (300), COC (300), MET (500), OPI (300), THC (50)
5 substance classes*	AMP (1000), COC (300), OPI (2000), PCP (25), THC (50)
	AMP (1000), COC (300), OPI (2000), PCP (25), THC (50) + SVT**
1 substance classes*	AMP (1000)
	BZO (300)
	COC (300)
	MET (1000)
	MTD (300)
	OPI (2000)
	THC (50)

DRÄGER DRUGCHECK 1200 STK

Saliva drug test, box with 25 test kits	Order No.
7 substance classes*	AMP (75), BZO (10), COC (36), MET (75), MTD (15), OPI (30), THC (45)
6 substance classes*	AMP (75), BZO (10), COC (36), MET (75), OPI (30), THC (45)
5 substance classes*	AMP (75), COC (36), MET (75), OPI (30), THC (45)

* The following substances can be detected with Dräger DrugCheck:

AMP: Amphetamine, BAR: Barbiturate, BUP: Buprenorphine, BZO: Benzodiazepine, COC: Cocaine, MET: Methamphetamine, MTD: Methadone, OPI: Opiates, OXY: Oxycodone, PCP: Phencyclidine, PPX: Propoxyphene, THC: Cannabis (figures in brackets describe the limit value concentration in ng/ml)

** SVT = sample manipulation test.
