

BLAZEX

Stored Pressure BXP6 ABC Dry Powder Extinguisher

ABC powder is a combination of Mono-ammonium phosphate and ammonium sulphate.

The powder has a low melting point and on Class A fires the particles fuse and swell to form a barrier which excludes oxygen and completes the extinguishing process and prevents re-ignition. On Class B fires the powder interferes with the chemical reactions that take place in the combustion zone, thus the flame ceases to exist.

The powder is non conductive and may be used in the presence of an electric current.

ABC powder will extinguish class A (carbonaceous) fires, class B (flammable liquid) fires and class C (flammable gas) fires.

Features

- Approved and certified to BS EN3
- Kitemarked product
- CE marked in accordance with the PED
- Colour coded screen
- Excellent fire ratings
- Gauge check with magnet
- Safe and reliable
- Manufactured in Great Britain

Technical Specification
