560 - 570 Series

Panic Exit
Hardware

Briton Outside Access

When used as part of the panic or emergency exit hardware solution, the Briton 1413.LE and 1413.KE units will provide a strong and durable means of access, lockable from outside.

Briton 1413.LE

Briton 1413.KE

Applications

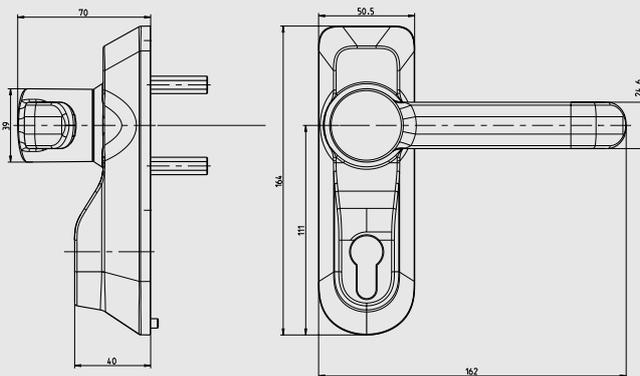

- For all high traffic applications - tested up to 200,000 cycles
- Suitable for Briton 376 Series panic and emergency exit hardware, Briton 560 Push Bar and Briton 570 Touch Bar panic exit hardware
- Suitable for single or double doors 40 - 100mm thick
- One model suitable for left and right hand doors

Features and Benefits

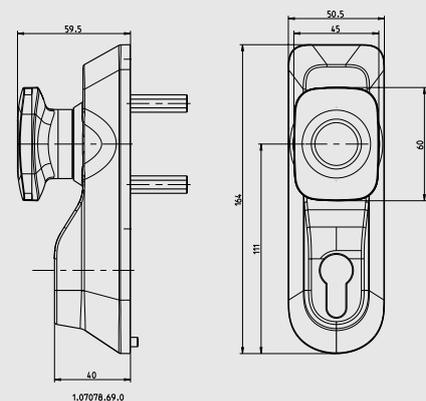

- Anti vandal design includes a clutch mechanism which allows the lever to rotate when the unit is locked
- Long lever provides good grip and easy action
- Easy retrofit on existing Briton 1413E models
- Common footprint allows units to be interchanged
- Supplied with 40mm euro profile standard differ cylinder (also available keyed alike or masterkeyed)
- Cylinders can be incorporated into existing masterkey systems
- Lever version is site reversible
- Lever version is BS 8300 compliant
- Optional key retention
- Silver finish as standard
- Also available in plated finishes, PB, SS, PS
