

Hanging solutions

Economy Hanging Kit

In the instance where a frame is not required - an economical fixing solution is available in the form of Zhooks. Suitable for suspending your JALITE safety signs - they offer the option to hang your sign from either a Plastered / flat ceiling, or an office grid ceiling.

Zhooks are ideal for connecting directly to JALITE signs which do not require frames. The perfect way to suspend any JALITE photoluminescent rigid sign is to measure 25% of the sign's over all length in from each side, and make a small drill hole (4mm diameter) 5mm from the top of the sign.

Code	Contents
Zhooks/clips	2 x Spring loaded Hanging wires
	2 x Adhesive Ceiling clips
	2 x Ceiling Grid clips

Spring loaded Ceiling hooks allow height adjustment.

Allows for adjustment dependant on environment.
