

Norfolk Premier Mobile Fire Extinguisher NRA50 - ABC 40 Dry Powder

NRA50 ABC 40 Dry Powder

ABC 40 powder is a combination of Mono-ammonium phosphate and ammonium sulphate.

On Class A fires the particles fuse and swell to form a barrier which excludes oxygen and prevents re-ignition. On Class B fires the powder interferes with the chemical reactions, thus the flame ceases to exist.

ABC 40 powder is nonconductive and will extinguish Class A (carbonaceous) fires, Class B (flammable liquid) fires and Class C (flammable gas) fires.

Rough terrain double bogey wheels are available.
