## Water Mist Fire Extinguishers

**Why choose water mist?** Water mist extinguishers contain only de-ionised water that is dispensed through a specialist nozzle to create a fine mist 'curtain'. The mist has a large surface area that gives it exceptional cooling properties, allowing it to effectively tackle a wide range of fires.

**How can water be non-conductive?** Water in its purest form cannot conduct electricity. It is only the presence of contaminants ("ions" such as ordinary salts and minerals in everyday tap water) that allows electricity to flow through it. When water is "de-ionised" these are removed. In addition, the fine water droplets created by the patented nozzle do not touch, so electricity cannot arc from the source to the user. It's safe to use on electricity up to 1,000 Volts, in accordance with BS EN 3.

**Where should water mist be used?** With remarkable versatility and leaving no residue to clean, water mist is ideal for minimising the damage that firefighting itself can cause. Ideal for offices, hotels, shops, nurseries, caravans and the home, water mist is non-toxic to humans, plantlife or animals as it contains no chemicals.

TECHNICAL DETAILS	MODEL	2ltr	6ltr
	CONTENTS	2ltr	6ltr
	FIRE RATING	8A, 8B, 25F, Elec	13A, 21B, 75F, Elec
	CHARGED WEIGHT	3.9kg	9.7kg
	OPERATING PRESSURE	15 bar	15 bar
	DIMENSIONS (H x Dia)	402 x 110mm	525 x 161mm
	DISCHARGE RANGE	1.5 metres	3 metres
	DISCHARGE TIME	15 sec	40 sec
	HOSE	Fixed nozzle	Hose
	PRODUCT CODE	UFXWM2	UFXWM6

Suitability

Class A

Class B

Class C

Class D

Class F

Electrical

Whilst this extinguisher has been certified to 75F (like others on the market), following our own independent research we do not recommend using water mist on anything above a 5F rated fire (this is equivalent to an average domestic deep fat fryer).
