

Care and Maintenance of Jalite Products

Acceptable Cleaners

Most mild Soaps with water or commercially available spray cleaners will remove most dirt and residue from the surface.

Routine Care

On a regular basis Jalite products should be cleaned. To properly clean use mop or cloth dampened with a mixture of warm water and cleaner, wipe the surface and allow to dry.

For more difficult residue, spray with commercially available cleaners and; wait for 30 seconds and wipe/rub with paper towel. Repeat as necessary. If residue remains after several attempt to clean the product, replace product as excessive dirt will hamper the performance of the products.

Unacceptable Cleaners

Avoid using abrasive cleaners or abrasive pads. Avoid using strong chemicals and solvents such as paint removers, oven cleaners, bleach or tub and tile type cleaners.
