

Hands-on! Code Handle®

ASSA ABLOY
Opening Solutions

4 digits separate your private or sensitive stuff from public access

You don't have eyes in the back of your head. It's impossible to keep watch over every private door in a public-facing space — the store room in a retail shop or pharmacy, or a toilet for staff use only. That's when you need Code Handle: it stands guard for you. With Code Handle, personal belongings, sensitive client files or storage materials are separated easily from public areas.

Keyless and convenient

Secure your private rooms with no keys, no wires and no expensive access control system. It's simple with Code Handle.

Easy to install and retrofit

All it takes is two screws to fit a Code Handle on almost any interior door. You'll receive a master code and up to 9 different user PINs.

Autolock

How frequently do you need to enter and leave the store room? No more needing to remember to lock the door. Be key-free. If you like, even handsfree.

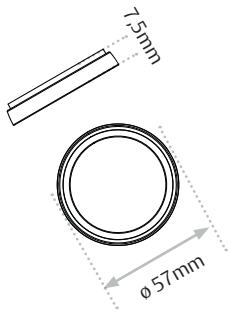

Application

Code Handle helps to control private access in public spaces, like archives, stock rooms, guest toilets, medical storage or offices.

Experience a safer
and more open world

Code Handle technical data

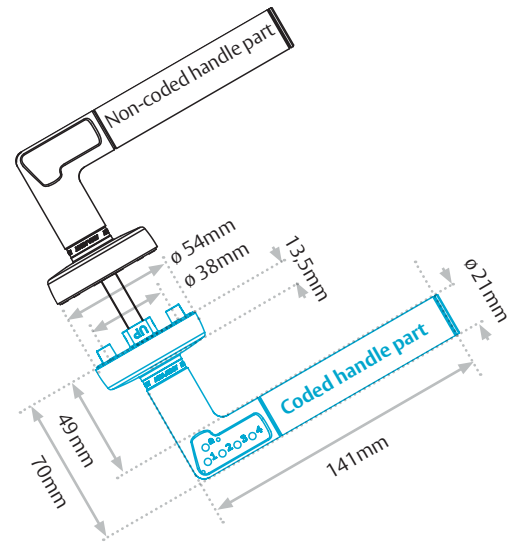

For European DIN standard lock cases
Suitable for commercial and residential applications

Distance ring
available to adjust the
rosette to the door
