

Site Manager

Remote monitoring for all your Pro devices

Site Manager's cloud-based software allows you to monitor device status remotely, giving you more control over the compliance in your building.

Benefits

Real-time device status monitoring

Access cloud-based information on any device

More control over fire door compliance

Instantly view status of devices from different locations

Forms part of your Golden Thread

Peace of mind over your buildings safety

1

Scenario 1

ProHub is hard-wired to the fire panel which will ensure all Pro Devices will close in the event of alarm activation. Site Manager is accessible remotely on any device allowing you to monitor compliance in your building.

2

Scenario 2

ProExtender is added to the Pro System to increase signal strength. This is suitable for larger buildings.
