

# DELTA500 – 500ml LITH-SAFE AEROSOL FIRE EXTINGUISHER

Designed for lithium-ion battery fires, our 500ml aerosol fire extinguisher is the perfect solution for tackling fires caused by devices like smartphones, laptops, electric scooters, and other small lithium powered products.

Manufactured on our BSI Audited UK production line and equipped with Aqueous Vermiculite Dispersion (AVD) technology, our DELTA500 aerosol fire extinguisher uses a non-toxic fire suppression agent that rapidly cools the source of the fire and forms a protective barrier, preventing the spread of heat and flames. This advanced technology ensures superior fire suppression, making it far more effective than traditional fire extinguishers, which cannot safely address the risk posed by lithium battery fires.

Compact and portable, the 500ml size makes it ideal for use in homes, offices, and other environments where small lithium-powered devices are common. Its user-friendly design ensures a quick response in emergencies, minimizing the risk of re-ignition and offering peace of mind.

Product Code	DELTA500
Description	500ml Lith-Safe Aerosol Fire Extinguisher
Battery Capability Suitability (Wh)*	Less than 60
Capacity (ltr)	0.5
Fire Rating	N/A
MED Approval	N/A
Throw Range (m)	Up to 2
Discharge Time (secs)	Up to 45
Working Pressure (bar)	10
Temperature Range (°C)	+5/+50
Product Height (mm)	291
Product Diameter (mm)	66
Filled Weight (kg)	0.72
Carton Height (mm)	145
Carton Length (mm)	330
Carton Width (mm)	295
Units per Carton	10

# DELTA500 – 500ml LITH-SAFE AEROSOL FIRE EXTINGUISHER

- Designed specifically for use on Lithium battery fires
- Additional Class A Fire Compatibility
- Safe for use on electrical equipment - 35kV Dielectric
- Test Approved
- Compact
- Lightweight
- Controlled discharge functionality
- Easy to store
- Non-toxic
- Environmentally friendly
- Manufactured in accordance with BS 6165:2019
- Cools the fire and creates a thermal barrier
- 3-year service life
- Maintenance free
