SOS101 Fire Extinguisher cabinet

**3 Year-
Guarantee**

Typical use:

For the storage of 1 x 6-9Kg/litre Fire extinguisher. Ideal for use in buildings, hospitals, shipping and marinas.

Description:

These cabinets are manufactured using highly UV resistant and very strong ABS injection moulded plastic for the back and polycarbonate for the lid. The high quality of the lid makes it easy to check the state of the gauge without needing to open the door.

The door can be hinged on the left or the right hand side to suit tight machinery spaces and is fitted with a very effective EPDM seal to prevent water/dust ingress.

The Polypropylene door latch is easy to open in an emergency and can be fitted with an anti-tamper seal.

TUV tested to IP54

NATO NSN J351 99 968 7722

Manufactured in the UK

Standard specification:

Dimensions (mm)

Height x width x depth: 762 x 282 x 211
